WE ARE FAMILY

1930

Pinocchio

1950

1952
Pinocchio Mask, which makes equalization possible. It is a major innovation in the early '50s. It is the most famous and most sold mask in the world's history, and it is still included in the catalogue.

1953
Rondine Fins - Also in the field of fins, Cressi invented the model that has inspired all other manufacturers, the first floating model in the world.

1957
Cressi athlete Mario Catalani wins the first spearfishing World championship and get the gold medal in Jugoslavia.

1960

1965
Cressi opened one of the first workshops that specialized in producing optical masks. Thanks to Cressi, even people with visual defects could now get full enjoyment of the underwater universe.

1970

1970
Equi-vest - In 1970, Cressi was the first manufacturer in the world to produce Equi-Vest, a futuristic jacket that became one with the scuba tank, supplied by a hose that drew air directly from the first stage. This was the first incarnation of the modern BC.

1970
Rondine L long fins - The world leader of molding rubber fins, Cressi developed the Rondine L long fins, which enabled Jacques Mayol to go onto achieve his astonishing freediving records.

1979
Fins range - Alongside the various rubber fin models, a futuristic model was presented with a reinforced nylon blade, called the Rondine Gara, a fin that thirty years down the line is still going strong, and has been adopted by world class freedivers and spearfishermen the world over.

1980

1983
Jacques Mayol, the first man in the world to challenge the 100m barrier. He reached a depth of 105 meters. The episode has gone down in history, the record was obtained in the waters of the island of Elba in 1983.

1988
Apache Arbalète - Cressi produced a complete range of Arbalète spearguns to join the pneumatic guns, called the Apache, which very soon became the Champion speargun in the world.

1989
Cressi athlete Renzo Mazzarri wins the spearfishing world title in Italy.

1990

1990
Cressi continues its international expansion and the products are by now distributed in over 90 countries world wide.

1999
Cressi Athlete Umberto Pelizzari sets the freediving "No Limits Absolute Variable Weight" World Record in Portofino (Italy) reaching the depth of 150 meters.

Big Eyes Evolution

2000

2000
Big Eyes was the first mask in the world with raked lenses in an upside-down teardrop shape, an innovative form that gives the diver a complete view of all the equipment worn. They became the most widely copied and imitated mask in the world, a gratifying appreciation of how far ahead Cressi is in the design of its products.

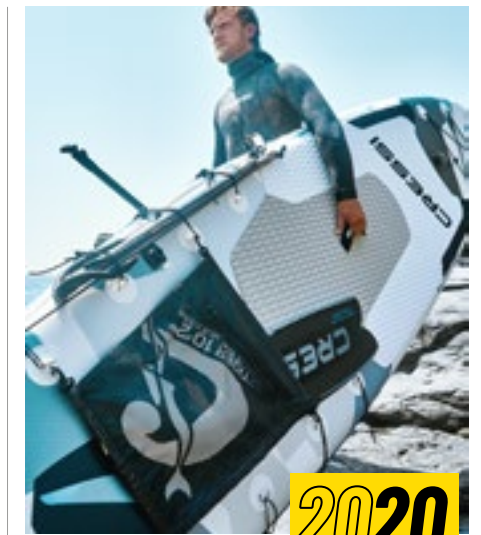

Leonardo

2010

2011
The Leonardo dive computer watch is introduced, the first of the products designed in-house by Cressi Elettronica in order to guarantee optimum quality, safety and reliability.

2013
The French freediving champion Guillaume Néry becomes a Cressi product endorser. The Giotto dive computer watch is introduced; it processes the data from repeat multi-day dives and dives with gas mixtures and also benefits from the Cressi RGBM algorithm. The Tracina wetsuit for spearfishing is introduced in a new and exclusive camouflage Dark Digital Specter Pat Cressi.

2020

2021
Hydrosports is the result of Cressi's experience, consisting of tradition, innovation and quality, since 1946. With its close relationship to the sea environment, the Cressi team has been able to develop this new collection in response to the direct needs it encountered in practice and through water tests on its products.

TODAY

The Cressi company is still entirely owned by the Cressi family, which carries on with the same passion, the work started by brothers Nanni and Egidio Cressi. Its spirit lies in the manufacturing tradition, with a clear preference for the conception and realization of its products in-house, from the initial design through to the smallest details. Cressi focuses on those who love all facets of the aquatic world. The company has never exaggerated with successful products on the market, but has instead always invested in research and development to the benefit of quality and reliability, the evolution of materials.

OUR NUMBERS

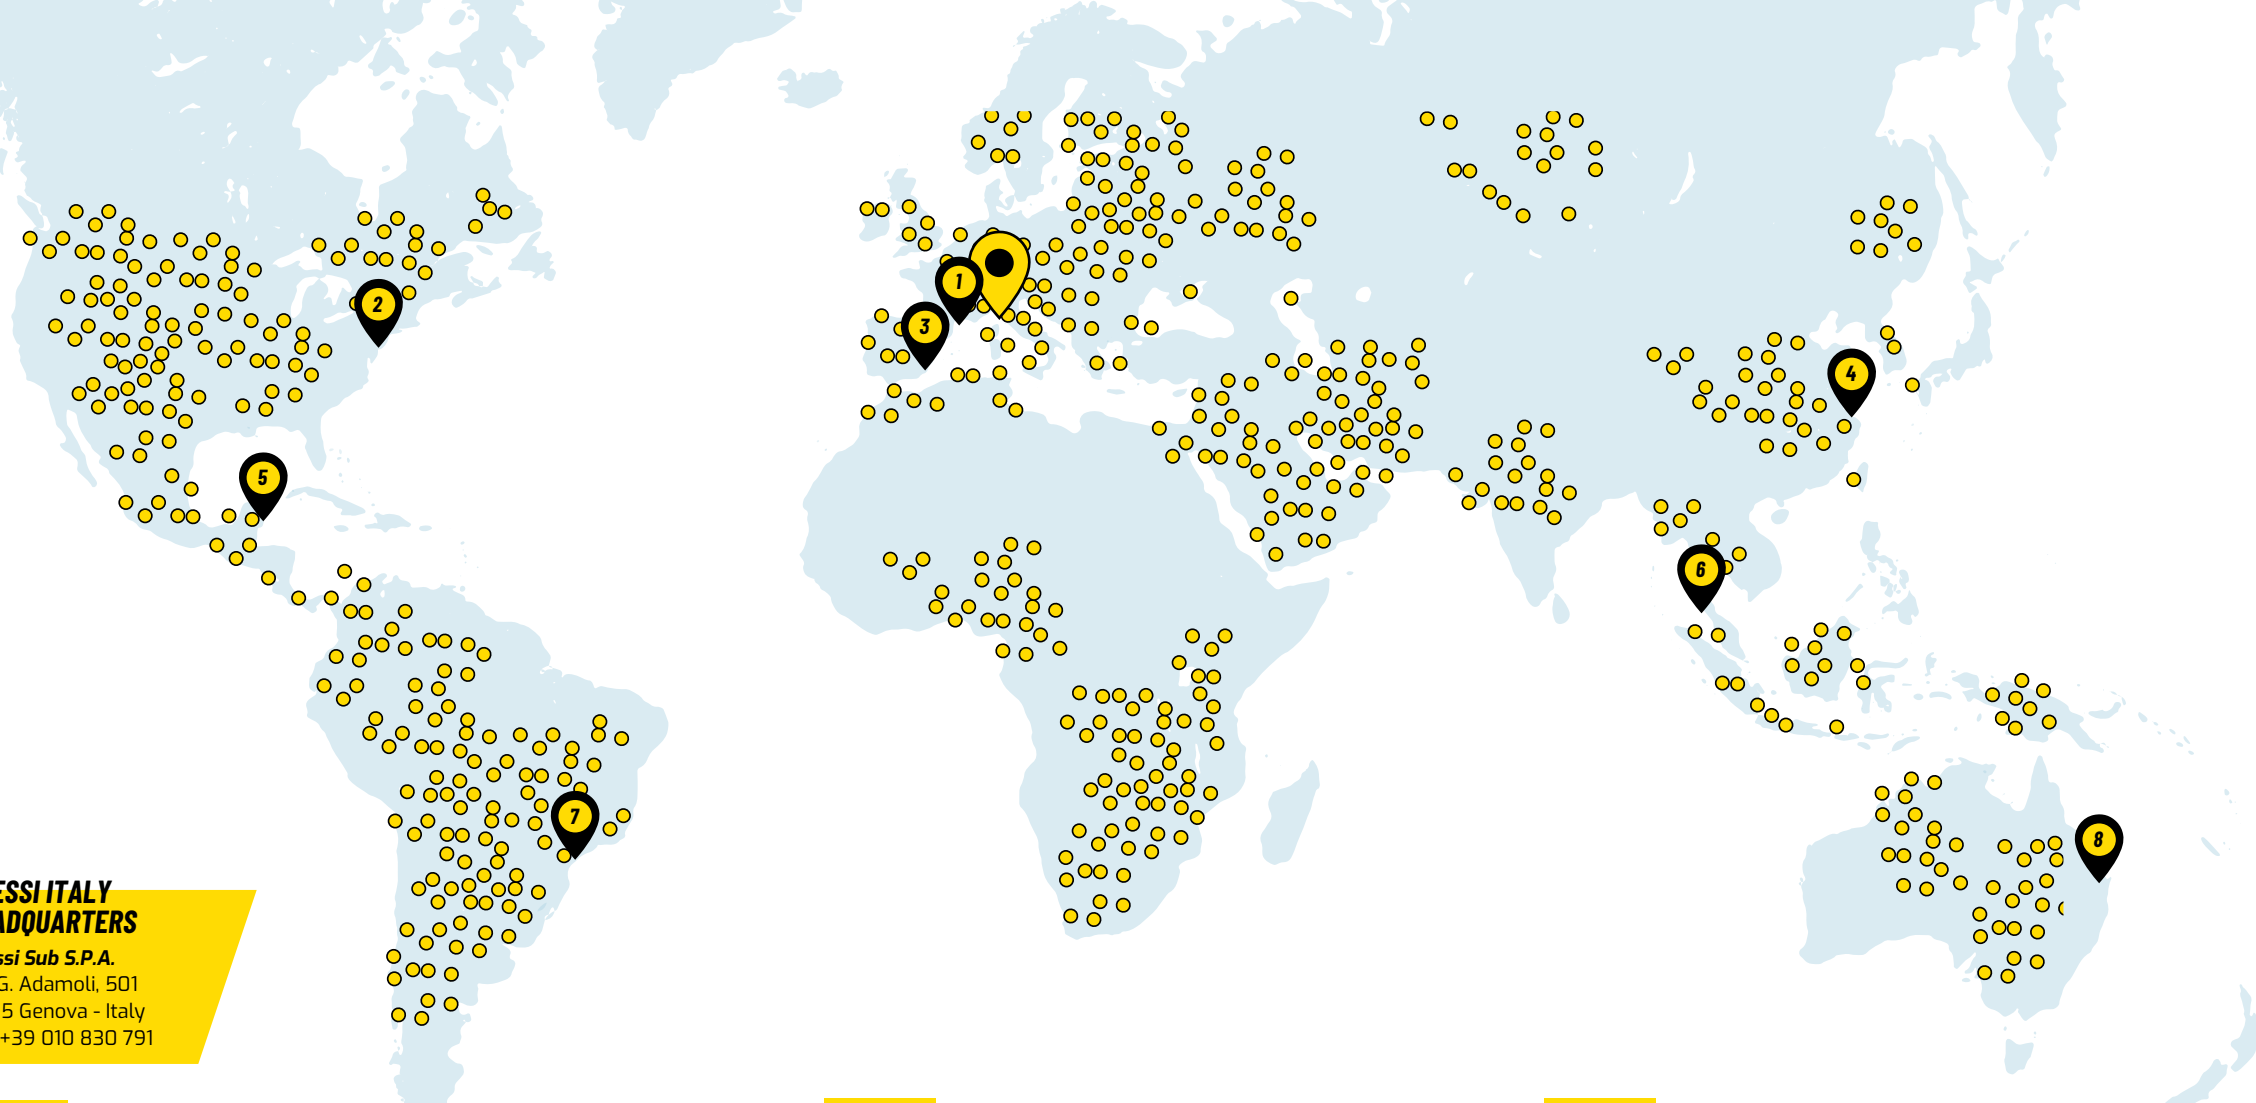

- 75 YEARS OF EXPERIENCE
- 7 BRANCHES AROUND THE WORLD
- SALES IN 100 COUNTRIES WORLDWIDE
- 100 PATENTS
- 11 TIME SPEARFISHING WORLD CHAMPION
- 7.000 REFERENCES
- UNIQUE STYLE

WHERE WE ARE

WORLDWIDE

Our headquarters is based in Genoa, and we also have eight branches: USA, Mexico, Brazil, France, Spain, China, Thailand and Australia. 70% of our products are made in Italy in our own factory, in Genoa. 10% of our products are made in our own production facility in Hungary and the remaining 20% is sourced from selected high-quality suppliers from Asia.

We have around 10,000 shops all over the world, and our products are sold in over 100 countries.

B2B

THE EXCLUSIVE AUTHORIZED DEALER ONLINE WEBSITE

B2B.CRESSIUSA.COM

WHAT IS IT?

We have developed an online order system, meaning you can now place your order at Cressi as you shop on any e-commerce website.

HOW DOES IT WORK:

Authorized and in coordination with your Territory Sales Manager, you will receive an invitation email from b2b@cressiusa.com

HOW TO ACCESS:

1. Contact your Cressi Sales Representative or Cressi USA office and ask for your credentials
2. Go to b2b.cressiusa.com, click on dealer area, type your credentials, and log in to place your order

THE FEATURES:

- Enhanced Experience To Order Easy And Fast. Product Information, Technical Features, Descriptions, Photos
- Direct Access At Any Time To Order Product
- Check-In Real-Time The Complete Cressi Catalog Products Inventory And Immediate Availability.
- Orders Management, Order History , And Shipping Information
- Backorder Management, With Accurate Estimates Of Arrival Times.
- Newsletter With Deals, Specials, Outlet

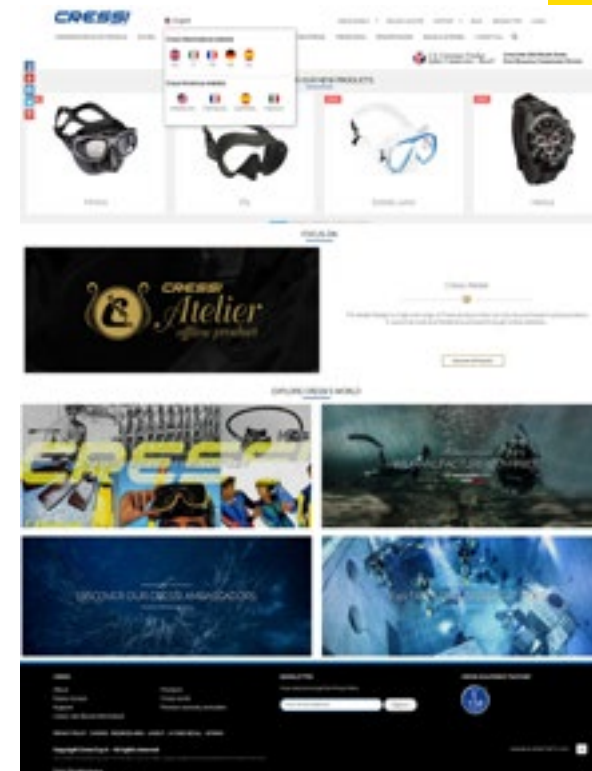

CRESSI E_LEARNING PLATFORM

CRESSI LMS (ONLINE E-LEARNING MANAGEMENT SYSTEM)

Bringing all things Cressi to you in a simple and easy to access way. The E- Learning Management system is made to educate our dealers on a wide range of topics from product, classes and certifications, all while in the comfort of your home or shop!

PIM

(PRODUCT INFORMATION MANAGEMENT)

1. GO TO www.cressi.com/cressiusadc
2. SELECT THE USA DIGITAL CATALOG
3. EXPLORE PRODUCT PROFILE

THE CRESSI'S PIM IS THE CENTRAL REPOSITORY OF ALL OF THE INFORMATION REGARDING THE PRODUCTS.

The Digital Catalog will help you to quickly find what you need, increasing your knowledge and experience. It is made to share all the possible information of a product, even images, videos, user guides, advertising material.

- Do you need an image of a product? Access the Digital Catalog and download it.
- Do you need to know the lift capacity of a Cressi BC? Search on the Digital Catalog and you will find it.
- Where are the fins size conversions charts? The answer is on the Digital Catalog.
- Do you need the part number for a replacement part for the Cressi product? The Digital Catalog is made for it.
- Do you need data for your e-commerce store? Just download them from the Digital Catalog.

CRESSI BLOG

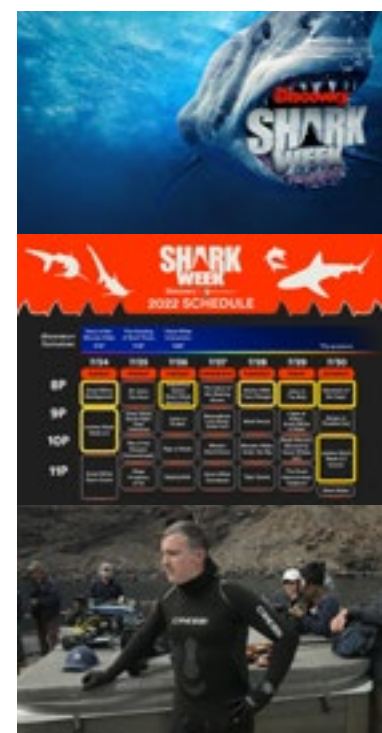

/ CO-OP JOURNAL

BLOG.CRESSI.COM

SINCE 2020, Cressi launch the Cressi CO-OP JOURNAL, where The Dive Community near Cressi will share awesome news and content.

- **FROM THE FIELD** From the sea of Liguria where Cressi had its beginnings to the oceans of the world, Cressi celebrates its passion for the underwater world.
- **WHAT'S NEW AT CRESSI** Our latest advances in gear technology, product design, software innovations and infrastructure.
- **ECO-NEWS** Cressi is committed to doing business and creating products that contribute to a sustainable future for our customers and the planet.
- **COMMUNITY** Cressi has transformed how it does business. In its earliest days, the diving and spearfishing community was a closely connected fraternity, a brotherhood of water lovers. Through tireless innovation and a commitment to this watersports community, Cressi continues to be an integral part of the community and the catalyst for change. At Cressi, every innovation is a step toward the future.
- **CRESSI AMBASSADORS** Our dedicated community of Lifestyle Ambassadors are serving to be a force for good by working to protect the ocean we all love. They inspire us with their stories and are role models for future generations that will follow them. For more than 75 years, Cressi has supported water lovers working to create innovative gear, increase safety in the sports of scuba diving, free diving and spearfishing.
- **SPEARFISHING** The best way to observe a fish is to become a fish." — Jacques-Yves Cousteau, a French naval officer, explorer, conservationist, filmmaker, innovator, scientist, photographer, author and researcher.

2022 SPECIAL MEDIA PROJECTS

SHARK WEEK 2022

Shark Week is seven-day marathon documentation about sharks that airs annually on Discovery Channel since 1988. Every year it features some popular celebrities who go underwater paying a visit to the apex predator. Last week of July, Discovery Channel's Shark Week is an annual, Jaws-dropping spectacle featuring more than 30 hours of original programming about one of nature's most feared predators.

2022 SHOWS

- Great White Battleground
- Jackass Shark Week 2.0
- Impractical Jokers: Shark Week Spectacular
- Sharks! With Tracy Morgan
- Jaws vs The Blob
- Monsters of the Cape

CIVE 2022 SECOND CRESSI INTERNATIONAL VIRTUAL EVENT

The Second edition of the Cressi International Visual Events was on October 22, 2022. It was a compilation of live virtual sessions that took place from country to country, starting in Australia and ending in South America. We have a robust agenda that includes different topics, many special guests, and our technicians that introduced the new 2023 Cressi products. It was an event to be with the Cressi Family, colleagues, partners, retailers, and media for 24 hours non-stop with a lot of content.

WHAT'S NEW AT CRESSI

COMMUNITY

ECO-NEWS

THE OCEAN IS WHERE WE BELONG

Our dedicated community of Lifestyle Ambassadors are serving to be a force for good by working to protect the ocean we all love. They inspire us with their stories and are role models for future generations that will follow them. For more than 75 years, Cressi has supported water lovers working to create innovative gear, increase safety in the sports of scuba diving, free diving and spearfishing. Today, more than ever, we need people who are willing to tackle some of the most pressing issues impacting the oceans of the world. That mission unites all our Ocean Ambassadors. Meet them below – and then find your passion and take action.

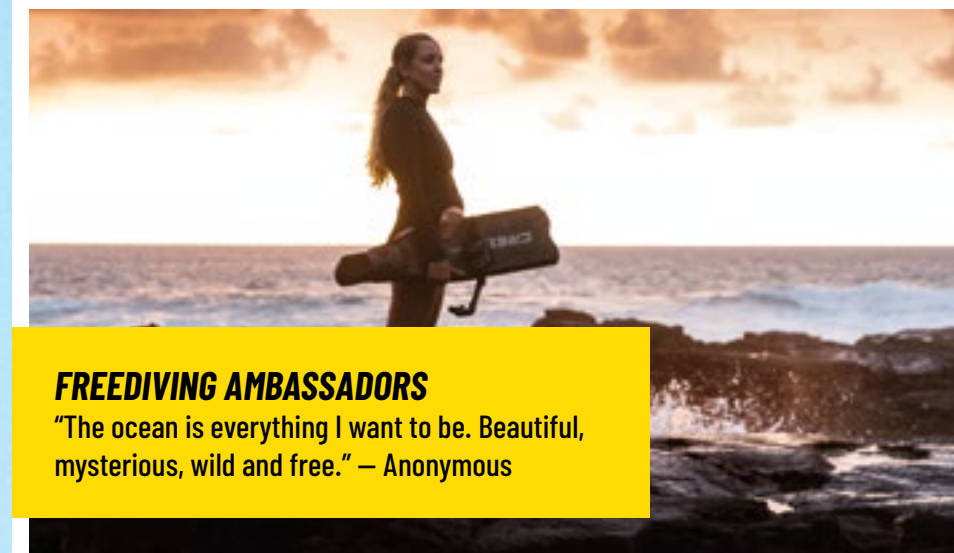

OUR AMBASSADORS

SCUBA DIVING AMBASSADORS

"Every time I slip into the ocean, it's like going home." — Sylvia Earle, American marine biologist, explorer, author, and lecturer.

FREEDIVING AMBASSADORS

"The ocean is everything I want to be. Beautiful, mysterious, wild and free." — Anonymous

SPEARFISHING AMBASSADORS

"The best way to observe a fish is to become a fish." — Jacques-Yves Cousteau

/ OUR AMBASSADORS

ASIA BRYNNE

[@asiabrynne](#)

I picked up my first disposable film camera at the age of 8 and never stopped shooting. The ocean is a place away from all of the noise, where you don't have to use words, time doesn't exist, and you can share space with animals. Being underwater is a break from the busyness of life.

THE BUCKET LIST FAMILY

worldwide

[@thebucketlistfamily](#)

The Gee family, just a typical family working from all over the world as Family Travel Journalists! Their story began in 2015, when they decided to sell everything and leave home for a trip around the world. They started an Instagram and YouTube channel called, The Bucket List Family.

DANILO CALLEGARI

Italy

[@callegaridanilo](#)

He explored the most inhospitable places in the world, swam in the oceans and climbed the highest mountains, he crossed entire continents by bicycle... then four deserts and the largest glacier in Europe. His mission is to fuse air, land and water into a single adventure.

GIADA CAMPANELLA

Italy

[@giadacampanella](#)

I am a dynamic yoga teacher, yoga for me is a connection to nature. In the water we are put to the test and we can only abandon ourselves to the water that envelops you and hugs you gently. When I dive underwater my mind is canceled, the body is abandoned and there are no other sounds other than that of your heart, then my mind calms down.

FABIO ROLLERI

Italy

[@fabioroller](#)

Breathe is a project that aims to raise awareness of the beauty of underwater nature. We were born in contact with the sea and water has always been part of us. Below the water level everything stops, it's just you, your heartbeat and your room! Calm rules everything around you and it is at that point that you realize how wonderful there is underwater.

IGOR D'INDIA

Italy

[@igordindia](#)

Igor has been able to combine his passion for outdoor adventure with his training in underwater filmmaking, camera drone pilot operation and advanced open water diving. He is deeply committed to participating in the global community who are fighting to protect the ocean.

THEO KNEVEL

Netherlands

[@theoknevel](#)

Theo is a scuba diving and advanced free diving instructor. He joined Cressi following a 10-plus-year career as a frogman in the Special Boat Service. He has been able to spread his passion for diving throughout the Caribbean. He is co-founder and chairman of the War Veterans Foundation.

BROOKS LAICH

USA

[@brookslaich](#)

He's a Canadian former professional ice hockey forward. He played over 750 National Hockey League games. Brooks is a multi-athlete and a sports lover, so what better way to kick off the day? A little snorkel session when the water is calm and fishes and turtles are active.

SHAWN MAHONEY

USA

[@thebeaconscollective](#)

All of my first gear was Cressi, and most of it since has been. The early pioneers of freediving wore Cressi and I saw how successful they were so I said why not emulate what they do? I loved and still do my Cressi Gara 2000's. That's why it was a no brainer to say yea to being a Cressi ambassador.

FRANCESCO MAGISTRALI

Italy

[@beyond.exploration](#)

Francesco is the creator of the Beyond Exploration brand. His family, his friends and his collaborators are all part of this team. In the name of Beyond Exploration's mission itself, Francesco's gaze is always turned towards the future. Adventure, travel and exploration are the means to deeply know the world, the Mystery and Humanity.

LLUIS MASUET

Spain

[@masuleti_underwater](#)

In 2016, tired of the business world, he tried scuba diving and began to learn underwater photography, a combination that in just a few short years made this Barcelona citizen a renowned, award-winning photographer. Lluís currently travels all over the world capturing beautiful images.

LEO MORALES

Mexico

[@leomoralessbuzo](#)

For many, scuba diving is an adventurous, recreational activity. For Cressi ambassador Leo Morales, scuba diving was therapy and the pathway to a second chance at life. After surviving a rare form of cancer, it was scuba diving that helped Leo to heal and find a deeper meaning into the purpose of his life.

REGINA DOMINGO

Mexico

[@regisunday](#)

Regina is part of the Nakawe project. The mission is to promote the conservation of critical ecosystems and species by working directly with communities to promote sustainable solutions to local environmental issues and educate local populations on the importance of biodiversity.

KRYSTAL DORN

USA

[@krystalklear](#)

Krystal moved to Hawaii, when she began photographing underwater and free diving. She is well known for capturing artistic images underwater, from mermaid photography to conservation awareness projects. Her mission is to help raise awareness for animal species.

GIULIA GABRIELLESCHI

Italy

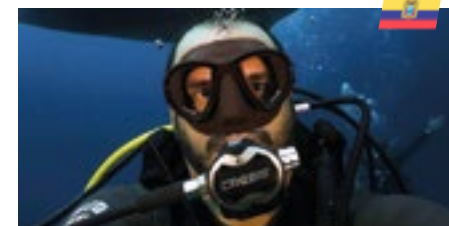

[@gabbri1996](#)

Giulia Gabrielleschi is an Italian swimmer, specialising in open water swimming. At the World Championships, she won a silver medal (Gwangju 2019) and a bronze medal (Budapest 2017) in the 5 km team event. The challenges continue and year after year she brings home excellent results.

ROBERTO OCHOA

Ecuador

[@robertochoahe](#)

Roberto Ochoa is a Videographer for Planeta Azul, he started making wildlife videos at the age of 25 in the Galapagos Islands, Africa and North America. Beneath the world's waters lie landscapes, species, vegetation, and populations as diverse and splendid as those on land.

OCEAN RAMSEY & J. OLIPHANT

Hawaii

[@oceanramsey](#)

"Mr. and Mrs. Sharks." She is a marine biologist, shark and marine conservationist, professional freediver and scuba instructor, surfer, swimmer and professional model. Juan grew up surfing, he became a divemaster. He traveled the world with to help combat illegal fishing and whaling.

CRAIG O'CONNELL

USA

[@thesharkdoctor](#)

I'm from a small town located several hours from the ocean. But I always had a fascination with the ocean, a fascination that really came to fruition during my first shark encounter in the Florida Keys when I was 14. My free diving and scuba career began and has been growing ever since.

CHRISTOPHER GILLETTE

USA

[@gatorboys_chris](#)

I'm born in Florida and have spent my life around the water. I love the freedom, weightlessness, and otherworldly views of diving. I try to use my passion to teach others about aquatic wildlife in the hopes they will learn to love them too, and ultimately help protect these fragile ecosystems.

KAYLEIGH & CAMERON GRANT

Hawaii

[@mermaid.kayleigh](#)

Kayleigh and Cameron are passionate divers who strives to educate and encourage people to protect our oceans. As a marine conservationist, Kayleigh understands the importance of educating people about ocean conservation. Through her work at One Ocean Diving, she's able to inspire people's in protecting the world's sharks and marine life.

PHILIP HAMILTON

UK

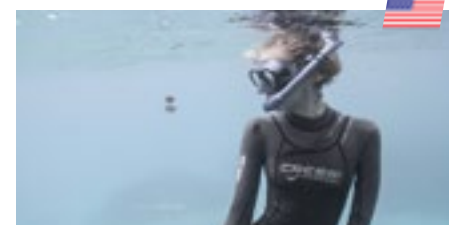

[@philip.hamilton.photography](#)

Philip Hamilton, filmmaker, photographer and author, is best known for his passion and dedication to ocean conservation. He has over thirty years diving and sailing experience and has documented most marine animals on the planet, from the majestic Blue whale to the smallest underwater critters.

NATALIE PARRA

USA

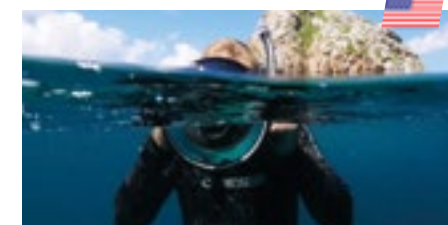

[@natalieparra](#)

I'm from Southern California. I grew up playing in the ocean, but it wasn't until I was visiting the island of Oahu prior to moving there that I tried freediving for the first time. It felt like flying and I couldn't get enough of it. I started researching, taking courses and learning from fellow free divers.

CRAIG PARRY

USA

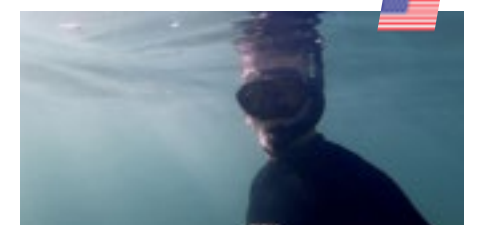

[@craigparryphotography](#)

It was his parent's gift of a disposable water proof camera that set him on the path to his passion. While most kids were reading comics, Craig was immersing himself in early editions of Australian Geographic. Finally the 35mm SLR set the course for Craig's future.

STEVEN PAYNE

USA

[@sevenpayne](#)

Steven grew up surrounded by open spaces, farms, and lakes; he loved exploring and seeing animals. His family moved to Florida, which cemented his love for the ocean. Steven is currently in the process of deploying artificial reefs: His nonprofit, The Reef Genesis Corporation, is his passion.

/ OUR AMBASSADORS

PIRRY

Colombia

[@pirryofficial](#)

Pirry is a Colombian journalist, writer, photographer, documentalist and important influencer that is dedicated good part of his journalist work talking about the Ocean and denouncing problems such as illegal fishing, pollution and many other difficulties facing the seas.

PRO RECCO WATERPOLO 1913

Italy

[@prorecco](#)

Pro Recco Waterpolo 1913 is a water polo club from Recco and is to this day the most successful team in the world. The sea as an indissoluble link in the history, the symbiotic relationship with Liguria, the sacrifice and the constant search for innovation to win the daily challenges.

ANDREW RAAK

USA

[@raakbottomimaging](#)

Passionate about all aspects of the marine environment, Andrew has worked as a dive professional for more than a decade. He has a degree in Marine Science, a captain's license and dive instructor certification. He has traveled the world photographing in amazing locations.

VOYAGES OF AGAPE

USA

[@voyagesofagape](#)

Agape is a 1984 Tayana Vancouver 42', hull #93. "Agape" means unconditional love. She is a true blue water cruiser, and has already seen much of Mexico, the South Pacific, and beyond. For us Agape is home. She is a safe and trustworthy vessel that will ferry us to the less seen places of the world.

JASON WASHINGTON

Cayman islands

[@caymanjason](#)

For the past two decades, Jason has been a leader in the Cayman Islands water sports community. A 2017 International Scuba Diving Hall of Fame honoree, Jason's focus both locally and abroad has been on protecting the delicate marine life found in the waters of the C. Islands.

CHRISTINE WEST & ADAM MAIRE

Hawaii

[@christine_regent_west](#)

After working as scuba instructors, adding cold-water diving was the greatest modification to their portfolio. Working together diving on a project in Alaska opened their eyes wide to documenting undersea life in extraordinarily different environments from the warm waters where they began.

MARIO RIGBY

Turks&Caicos

[@mariorigby](#)

In 2018, Mario completed his crossing Africa journey, a two-year trek walking and kayaking from Cape Town to Cairo. This expedition allowed him to connect with communities and share their message and stories. His goal was to inspire people globally to get out, be brave, and see the world.

ARIANNA ROMERI

Italy

[@ariannaromeri_art](#)

I grew up surrounded by equipment and the perfume of neoprene, watching my dad dive and waiting for my moment. I signed up for a freediving course. It wasn't love at first sight, I learned to appreciate it when it became the key to getting to know myself, through its timing, calmness and sensitivity.

CHIARA SALOMONI

Italy

[@chiaraphoto](#)

I remember snorkeling all over the Mediterranean Sea, using my father's Cressi fins, which were oversized for my feet. I got into scuba and moved to the U.S. to follow my dream of becoming an underwater photographer, so that I would have the chance to be in the water as much as possible.

JACINTA SHACKLETON

Australia

[@jacintashackleton](#)

Jacinta Shackleton is a marine biologist and educator at Lady Elliot Island, located right on the Great Barrier Reef. You might recognize her name from her stunning work filming and photographing marine animals. Most notably, she is 1/50 people to have seen and filmed an Ornate Eagle Ray.

JONATHAN SCHUTTE

Cayman islands

[@jonschutte](#)

For as long as I can remember I have had a passion for traveling and telling stories. I love to create content and share my adventures. Through my project Nauti Nomad I hope to inspire you too to embrace life and pursue your passions, respect our planet and help each other!

SULUBAAI FOUNDATION

Philippines

[@sulubaaifoundation](#)

Our approach consists in developing our objectives and making our site a model of sustainable management and a leader in ecosystem restoration. We believe that ecosystem preservation requires the involvement of local communities, and that the active management of marine protected areas is necessary to achieve results to deal with existing issues.

LUCA TIXI

Italy

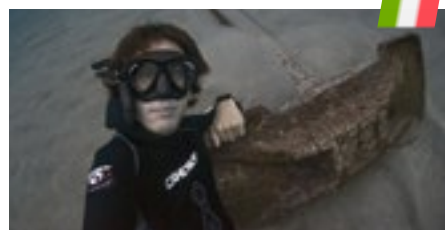

[@outdoorportofino](#)

I was born and raised in Recco, at the time of high school, in a period of environmental militancy, the enlightenment arrives: I understand that my job will be to bring people into nature! After graduating in Marine Environmental Sciences at the University of Genoa, I founded Outdoor Portofino.

FEDERICO TRAVERSO

Italy

[@skullphoto_aka_surfskull](#)

He is a young Italian designer and collaborates with Cressi for many years. Federico is passionate about the sea in all its forms, practice surfing and freediving but instead of hunting, he prefers to take pictures and videos. He starts each day with a morning swim session in the sea.

NANJA VAN DEN BROEK

Netherlands

[@nanjafreediver](#)

Nanja van den Broek started freediving in 2001 and in her first competition she immediately set two national records. In 2015, she set a new world record in the discipline Variable Weight with a dive to -130 meters, this record is also her 30th national record.

/ OUR AMBASSADORS

CRESSI, EQUIPMENT PARTNER OF Y-40®

In March 2019 Cressi officially became the partner of Y-40® The Deep Joy, the deepest pool in Europe. From that moment on, the recreational diving and freediving equipment available at Y-40® is provided by Cressi.

Y-40® The Deep Joy is the place where everything is possible, where you can live the most amazing aquatic experiences.

4,300 cubic meters of thermal water where there are free diving and scuba diving courses. It's a safe environment for professional exercises and scientific research, in addition to being an amazing film set and area for photographic and advertising services. Y-40® has an area of 21x18m; the maximum depth is 42.15 meters with different platforms at intermediate depths and caves for technical activities.

The deep pool can be visited, it is possible to walk in the transparent tunnel that crosses the structure, discovering the magic of this big human aquarium.

[@y40_thedeejoy](#)

CRESSI FREEDIVING
2023 COLLECTION

The range of blues that will be used to reflect the brand personality of Cressi's Freediving line go from a calming teal to a meditative inky-blue. Only freedivers know the feeling of testing their limits – to push their body to explore underwater by using only their breath and the equipment that helps ensure their safety – Cressi's Freediving products are ones that freedivers can trust with confidence. From low-profile masks to easy-breathing snorkels to high-performance fins, Cressi's freediving products offer freedivers the opportunity to experience freedom, adventure, community, self-expression, mindfulness and personal challenge.

KING NEW COLOR 2023

FREEDIVING COMPUTER WATCH

With a case diameter of only 48 mm and a highcontrast display of 35 mm, King is an extremely compact watch-computer specific for freediving. This innovative product boasts an algorithm developed in Cressi, which protects the freediver from the risk of Taravana, and a function that avoids the risk

of pulmonary edema. Mineral glass, heavy duty case with steel buttons for resistance to water pressure up to 120 m | 393 ft, metal bezel in AISI 316 steel with surface treatment and Inkfilled strap to prevent tears and breakage) with stainless steel buckle.

GARA TURBO CARBON

29 DEGREE ANGLED INTERCHANGEABLE BLADE SYSTEM

Following the Impulse project, we have successfully transferred the same design parameters for S-shaped undulating deformation to this innovative carbon fin. This particular movement permits a notable accumulation of elastic potential energy in the blade, which is released in the return kick, transforming into thrust. The effect has been achieved using a finite element program that enables the performance offered by carbon fiber to be exploited to the full. The blade is all-carbon-fiber with an angle of 29°. The fiber is imported from Japan. The shaped and processed sheet is then produced in a specialist plant in Turkey.

The blade is subsequently finished with an industrial co-molding process at Cressi's Genoa plant. The elevated chemical bonding

achieved between blade and rail, effectively creating a single piece, has permitted the elimination of the rigid glue that prevented the carbon fiber blade from flexing naturally. The thermoplastic rubber used for the water channeling rails is extremely flexible and soft so as not to undermine the intrinsic characteristics of the carbon fiber. The blade is, therefore, less fragile and more protected by the rubber. The end result is a very light fin, which manages to exploit the maximum flexion of the carbon in every square millimeter.

TECHNICAL FEATURES

- Excellent propulsive performance 29 degree angled interchangeable carbon blade
- Modular detachable fin
- Superior performance
- Superior comfort
- Self adjusting foot pocket diving even during desaturation

GARA MODULAR INSOLE INCLUDED

The insole for Gara Modular fins is recommended for use with thin socks in temperate waters because it improves the kick performance. The semi-rigid material of the insole is completely recycled. The insoles are supplied as a pair (right and left foot) and can be cut into their shape in three different sizes, according to pre-printed guidelines.

- Down-size Gara Fins foot pocket preformed sole
- Easily adjust size
- Non-corrosive plastic construction

GARA MODULAR IMPULSE

29 DEGREE ANGLED INTERCHANGEABLE BLADE

The Gara Modular system introduced by Cressi makes this a perfect choice for deep freediving and spearfishing for divers of all levels. The modular design lets the user replace / interchange blades for specific diving purposes, which make this the perfect fin to grow with, as the diver can change blades as their skills increase. Any standard Fiberglass or Carbon Fiber long blade will interchange in minutes without any modifications to either.

GARA MODULAR

MINIMUM EFFORT >>> MAXIMUM POWER TRANSFER

The Gara Modular system makes this a perfect choice for deep freediving and spearfishing for divers of all levels. The modular design lets the user replace / interchange blades for specific diving purposes, which make this the perfect fin to grow with, as the diver can change blades as the divers skills increase. The self adjusting foot pocket is constructed with the most modern multi compound joining process to

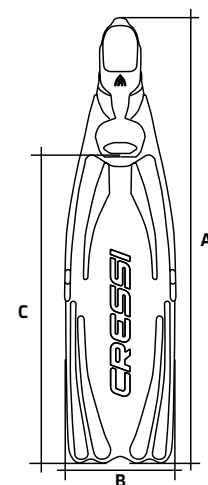

deliver a foot pocket that can offer comfort and suppleness around the foot where desired and yet have stiffer compounds under the foot pocket and heel area where power transfer takes place. Can be comfortably worn with or without neoprene socks.

GARA MODULAR SET

GARA PROFESSIONAL FINS + METIS MASK + CORSICA SNORKEL

Cressi made this set composed of professional items, of high quality and performance, to give the opportunity to use high-standard equipment for freediving and for spearfishing. The Modular system gives

the possibility to change the blades with more performing models. The mirrored lenses of the Metis mask increase the vibrance of the colors underwater and hide the eyes from fishes, not frightening them.

BLADES MATERIAL MEDIUM COMPOSITE FIBERGLASS

The Composite Fibreglass is the world's most advanced composite diving fin blades. The customized hybrid epoxy resin system, coupled with state of the art design and aerospace grade fabric combine to create a fin that transfers the load to the larger muscle groups, instead of focusing on any one specific location. All the blades are hand made by DiveR in Australia and come with a 3-year warranty.

GARA 3000 LD

LONG DISTANCE

The Gara 3000 LD is Cressi's entry-level long blade fin designed with softer blades, which makes the Gara 3000 a perfect choice for the beginning diver or those unexperienced with long-fin blades. The Gara 3000 is constructed with durability in mind and long soft plastic blades that can effectively transfer power with minimum effort.

This makes the fin comfortable and easy on the legs for beginners as well as during long duration dives.

The Gara 3000 is an extremely comfortable and is a full footpocket style fin. This fin is also constructed using Cressi's unique three material molding process, where

different compounds are bonded together to provide flexibility in the foot area, while being able to deliver power through the blade due to the stiffness the process provides. Can comfortably be worn with or without neoprene socks.

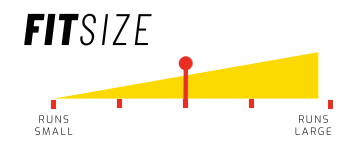

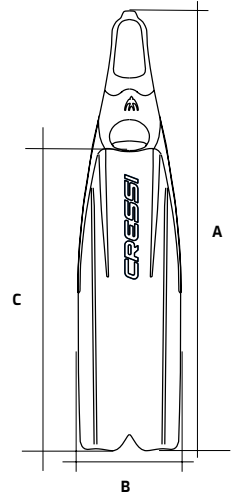

TECHNICAL FEATURES
• Durable construction designed to take abuse
• Soft long blade for ease of use
• Full footpocket for comfort
• Long blade for efficiency

GARA 2000 HF

HIGH FREQUENCY

TECHNICAL FEATURES

- Stiff Long Blade designed for maximum depths
- Full footpocket for comfort
- Long blade for efficiency

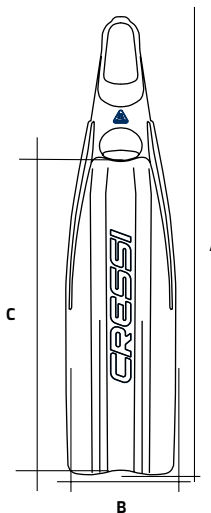

Gara 2000 HF is an icon in the diving industry, and is the first fin in the industry to be manufactured using a three material molding process. Due to its lightweight and durability, it is an excellent choice for those looking for a fin that can provide the ultimate in performance while deep freediving and spearfishing, and those looking for obtaining maximum depths. The GARA 2000 has the stiffest blade in the CRESSI line and is

an extremely comfortable full footpocket style fin, with long firm blades with built in stringers and runners to effectively direct water flow down the blade aiding in efficiency. This fin is constructed using multiple compounds bonded together to provide comfort and suppleness in the foot area and strength and rigidity in the heel and blade area. Can comfortably be worn with or without neoprene socks.

GARA PROFESSIONAL LD

LONG DISTANCE

TECHNICAL FEATURES

- Firm blade designed to run over the footpocket for ease of use
- Full footpocket for comfort
- Thermo-Rubber soles for extra grip on wet surfaces
- Stiff long blade designed for maximum depths
- Full footpocket for comfort
- Long blade for efficiency

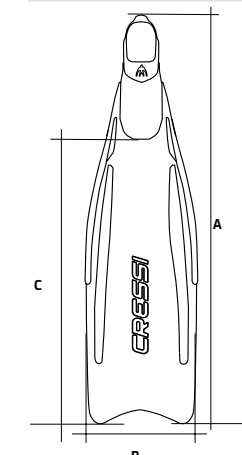

The Gara Professional LD is a high performance fin, requiring minimum effort to load the long blades. They are more forgiving than other long blade fins for untrained legs, making this an excellent choice for deep freedivers and spearfishers of all levels. They are ideal for long distance swimming, while ultimately providing the power and efficiency needed for deep freediving and spearfishing. Due to the multi

compound bonding process used during the manufacturing process, the Gara Pro LD is an exceptionally soft full footpocket style fin, which provides comfort during prolonged use on those long days in the water. Gara Pro LD delivers maximum power with minimum energy through its long firm blade that runs over the footpocket. Can comfortably be worn with or without neoprene socks.

RUBBER FIN KEEPER

The simple things in life often turn out to be the most useful and Fin Keepers are a perfect example. Their benefit is great especially if your foot pocket fits a little loose. They are a simple, inexpensive concept that works great, they last for years, yet rarely mentioned. Fin keepers keep the foot pocket tight against the heel giving the diver full fin power. You can't truly appreciate them until you use them.

When you do, you will notice the difference in power instantly. By holding the foot pocket against the bottom of the heel they limit or delete lost power. Without fin keepers every time you kick the fin the foot pocket will lift off your heel. Just a 1/4" of movement away from the heel will result in major power loss. Power is lost but spent energy is unchanged.

DOUBLE INJECTION SILICONE STRAP

ATOM

NEW 2023

ULTRA LOW VOLUME MASK

Atom is a radical mask, with incredible low internal volume, thought and built for freediving.

It is a frameless mask. Construction material has been reduced to the minimum.

Inside the silicon facial a stiff core is co-stamped with the two lenses, giving just the right rigidity to the mask.

This semi-rigid core substitutes the usual external plastic frame and allowed us to reduce the internal volume of the mask in an unseen way until today.

Another feature of Atom is the ergonomic shape of the nose.

Two small cavities, carved by the nostrils, facilitate the action of compensation. This makes the mask extremely stable during the dive. Atom will not move when you compensate pushing

Atom is the perfect mask for the expert free-diver and spear-fisher, who wants the maximum performance from its gear.

CALIBRO SF

PATENTED INNOVATIVE FOG STOP SYSTEM

Cressi's next generation diving masks are all equipped with the Integrated Dual Frame Technology which offers exceptional field of view, and the new Calibro is no exception.

The mask is designed so that the integrated face and frame allow for an extremely hydrodynamic and compact shape and a particularly wide lens, maintaining the mask extremely close to the face. Cressi's Calibro combines minimal internal volume with a phenomenal field of view due to the raked angle of the frame.

The buckles are, as always, directly integrated into the rigid skirt through a solid but flexible rubber attachment that allows you to adjust and place the mouthpiece without shifting the mask. Thanks to its matte coating the mask's components all match, enhancing the underwater experience since it prevents reflections in the water that may disturb marine life. Calibro is the perfect mask for freediving since it is designed to provide the diver with a feeling of total freedom and comfort.

CRESSI PATENTED TECHNOLOGIES

★ **INCLINED GLASSES**
US 8281417 B1

Cressi has developed and patented in 2001 a particular mask frame that to solve the problem of the divers not being able to easily see the scuba equipment. A scuba diver carrying many different pieces of equipment, some of them are vital like the pressure and depth gauges.

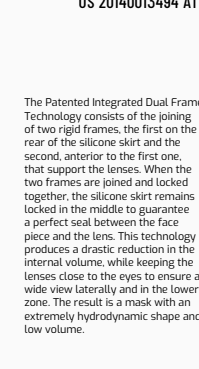

The solution has been found designing a new frame shape that is inclined downwards. Moreover, the shape of the lens is designed like an inverted teardrop increasing drastically the downward visibility.

★ **INTEGRATED BUCKLES**
US 8281417 B2

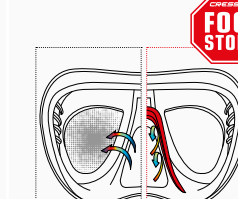

The patented technology is to provide a mask for aquatic activities that avoid loss of watertight during strap-tightening by a diver when the mask is in use underwater. The object of the invention is to avoid exertion of a tensile force or stress during mask adjustment and, in turn, rupture of the skirt. The buckles are not directly fixed to the frame but anchored to the rubber of the skirt, allowing it to freely swivel and pivot in all directions. The buckles are joined with lateral sides of the frame by brackets extending from the lateral sides. The brackets are made of a selected flexible material. This features facilitates the mask storage when not in use.

★ **INTEGRATED DUAL FRAME**
US 20140013494 A1

The Patented Integrated Dual Frame Technology consists of the joining of two rigid frames, the first on the rear of the silicone skirt and the second, anterior to the first one, that support the lenses. When the two frames are joined and locked together, the silicone skirt remains locked in the middle to guarantee a perfect seal between the face piece and the lens. This technology produces a drastic reduction in the internal volume, while keeping the lenses close to the eyes to ensure a wide view laterally and in the lower zone. The result is a mask with an extremely hydrodynamic shape and low volume.

★ **ANTI-FOG SYSTEM**
PATENT PENDING

A patented membrane surrounding the inner nose pocket which acts as a barrier and traps any moisture escaping from the diver's nose involuntarily when breathing through the mouth. Not only is the moisture channeled away from the lenses, thus avoiding the fogging up of them, but it also reduces the need to compensate for pressure.

NANO

85 CM³: ULTRA LOW VOLUME

The Nano is for advanced divers, freediving and spearfishing lovers, designed to offer an extremely hydrodynamic and compact shape to help divers cut through the water and aid movements in small spaces. To develop the Nano mask, Cressi invented and patented the Integrated Dual Frame Technology System that joins the silicone skirt to the rigid frame lens without interruptions to

guarantee a perfect seal and drastically reduce the internal volume. It does not require intentional equalizing. The swiveling buckles feature micrometric regulation. The mask features inverted teardrop lenses slightly inclined made in tempered glass. An anatomical strap ensures a perfect seal on the head. Available with mirrored lenses to hide your eyes while attracting fish.

AIR

The Air mask has a particular tapered structure deriving directly from the highly popular Nano-mask patent. The Dual Integrated Frame Technology System joins the silicone skirt to the lens frame without major interruptions of the curvature continuity. The result is a mask with an extremely hydrodynamic shape and a significantly smaller size, with equal visibility. Thanks to the Inclined Lens Patented

Technology, the field of view obtained is particularly wide, laterally and in the lower zone. The skirt, in the front part, has a structural silicone insert which increases the sealing ability of the mask and creates an exceptionally pleasant chromatic play. Micrometer adjustable buckles.

PACKAGING

EYES EVOLUTION

The Eyes Evolution Crystal comes with all of the great features of the Big Eyes Evolution Crystal, but in a smaller size that makes it ideal for women and smaller faces. The Crystal Silicone is an exclusive

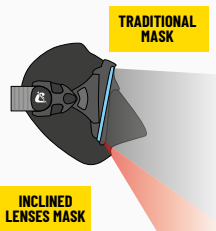

Cressi material that's so clear the mask's skirt is virtually invisible when diving.

The thickness of the mask frame has been reduced to such an extent that it is practically invisible when the mask is being worn.

Z1

LOW VOLUME FRAMELESS MASK

Z1 is a frameless mask that boasts a low internal volume while offering a wide field of view in all directions.

The specific design uses the assembly of the silicone skirt directly over the single glass. This system guarantees great sturdiness and

a perfect watertight seal. The lower weight of the mask makes it ideal for travel. The flexible fit and reduced drag are appreciated for freediving and spearfishing, snorkeling and diving. The micrometrically adjustable buckles are comfortable and effective.

MATRIX

The compact twin-lens Matrix takes the basic design concepts of the Big Eyes Evolution and pushes them to a new level of performance.

More pronounced inverted tear-drop shaped lenses, raked inward to sit even closer to the eyes, and a more compact build overall make the Matrix an ideal choice for divers and freedivers looking for the biggest view in the smallest package.

METIS

The Metis is a two-window mask suitable for scuba diving and also for snorkeling. The skirt is completely made in high quality silicone, a more comfortable and long lasting material than the traditional plastic PVC. The silicone skirt allows to be fitted from different kinds of face shapes and ensure a perfect seal. Also the strap is made in silicone and it is large and wide behind the neck to ensure a tight fit and comfort. The length of the strap is easy to adjust thanks to the simple push of the wide buckles. You can choose different kind of lenses, colored or mirrored, to increase the

view underwater. All the lenses are made in tempered glass to ensure shatterproof and scratch resistance. The nose pocket is soft and easy to access used with only two fingers for proper equalization, also wearing gloves.

Special lenses edition are ideal per spearfishing and photographers. Yellow lenses increase the vibrancy of the colors and helps to see better the details in depth water. Available with Mirrored Lenses for hiding your eyes to the fishes.

SUPEROCCHIO

Superocchio is the grand classic in the Cressi line, it is still a favorite among many divers through its many years of availability. Superocchio is small, compact and provides low internal volume, which makes it a great choice for deep diving and spearfishing due to its low internal volume, which allows for minimal effort from the diver to comfortably equalize during descent.

The allergy free black silicone skirt protects the diver's eyes from unwanted back glare and distraction while spearing. The soft silicone mask strap comes with easy and quick adjusting buckles to help provide a comfortable precise fit and can be easily manageable even when wearing neoprene gloves.

CODE	COLOR	CASE PACK
DN234650	Black/Black	6

MINIMA

THE LOWEST VOLUME ON THE MARKET

This mask was designed specifically for deep sea diving, with innovative features that place it at the top of its category. The special reduced skirt, complete with a small seal ring, sticks like a suction cup to the face, leaving minimum air space inside the mask, which make compensation extremely easy, taking very little air from the lungs.

The lens-eye distance is the absolute smallest on the market and guarantees, even with small diameter lenses, excellent visibility in all directions. The two optic glass lenses are thicker than the standard to allow a special safety mould. The strap comes with instantly adjusting buckles for an easy and precise fit.

PINK FLUO

TURQUOISE

CORSICA

Corsica is a highly technical snorkel designed specifically for deep freediving and spearfishing. The soft bendable large diameter tubing makes it extremely comfortable to properly position behind the head while maintaining ease of breathing on the surface. When diving, the mouthpiece tucks neatly under the chin for the ultimate in hydrodynamics. The anatomical hypoallergenic silicone mouthpiece provides extreme comfort during long duration in the water. The Corsica is available in either solid or camouflage color and is an excellent choice for the discriminating diver who is looking for the best equipment.

TECHNICAL FEATURES

- Two-piece wetsuit
- Ultra durable neoprene

JACKET WITHOUT ZIPPERS
HIGH TROUSERS

X-PLUSH ELASTIC TERRY LOOP

ELASTIC
PLUSH INSIDE

Robust wetsuit also ideal for commercial fishing. Fisterra was originally born in version 8mm, to respond to the need of professional divers in cold waters. The demand for professional divers, diving instructors and users who demand maximum thermal performance and comfort has encouraged us to incorporate a 5 mm version for temperate waters into the collection.

Fisterra 5 mm is a resistant, very watertight and highly thermal combination with jacket without zippers and high trousers with dungarees. A combination that combines,

therefore, characteristics that place it at the apex of pure performance in a wetsuit of this thickness. Low-compression LC neoprene that guarantees optimum thermal protection at the bottom due to its high resistance to compression ideal for professional work or long duration diving. Nylon outer lining of high weight very resistant, interior X-Plush elastic terry loop, waterproof and great sliding that facilitates the placement and removal of the suit at the same time has a large thermal memory. Wide anti-abrasion knee-spin pads and elbow pads in Supratex®.

LAMPUGA

TWO-PIECE WETSUIT

Inspired by the livery of the pelagic fish. A special digital printing system has been used for this new camouflage wetsuit, allowing high resolution images to be obtained and thus create an exclusive camouflage design. The new "Cryptic Camouflage Technology" of Cressi is based

on a real image of a fish (a dolphin fish in this case, with its dominant colours), to create camouflage that is very close to the original and then altered to obtain a repetitive effect that is one of a kind. The materials used are: high elastic camo on the outside, open-cell neoprene on the inside.

the blue waters of the Caribbean Sea to the greener tones of the Northern USA. It is manufactured with flexible, comfortable, soft neoprene. This material is designed for flexibility.

This wetsuit is named in honor of the Tokugawa shogunate – The Tokugawa shogunate was the last feudal Japanese military government, which existed between 1600 and 1868.

TOKUGAWA

MONOPIECE WETSUIT

Designed for blue water spearfishing Tokugawa, named after the Japanese feudal shogunate, is a one-piece 3 mm thick wetsuit, perfect for spearfishing, freediving and swimming, as well as for open water and pool training. The unique camouflage of this wetsuit is appropriate for different aquatic environments, from the blue waters of the Caribbean Sea to the greener tones of North American waters. The wetsuit's graphics provide the ultimate in camouflage

for all environments. Tokugawa, which is made of elastic, flexible, comfortable and of neoprene, has an anatomically designed cut specific to Cressi wetsuits, with preformed arms and legs that improve wearability and movement in the water.

The chest and the knee pad reinforcements are designed specifically for spearfishing.

The Dura Stretch nylon lining improves the wetsuit's elasticity, comfort and durability.

POLYBAG

ANTI-SLIP SOCKS

2.5 MM

These are single-lined, thin, high stretch neoprene socks. The inner is lined in Metallite so they are easy to put on. The sole has an effective non-slip lining. They can be used with both closed foot fins for greater warmth and to protect the skin from scratches and chafing, as well as with firm-soled socks, using open-heel fins. In this case, warmth is considerably increased and it is also easier to put on your wetsuit.

FREEDIVING TRAINING BUOY

TECHNICAL FEATURES

- Outer bag made of 1050 Denier Cordura fabric
- Inner bladder with inflator valve
- 4 TPR lateral handles
- 2 lateral stainless steel D-rings
- Underneath central large stainless steel D-ring for rope connection
- Large storage compartment with Velcro closure

Dedicated to freediving lovers. It has a durable external material, an external zipper pocket, 4 external handles for pre-immersion preparation, and 2 exterior D-rings. The wide interior space allows storing the rope during transport. The inner bladder features a

valve offering the choice of oral inflation or the use of an inflator hose. The freediving rope can be connected to the underneath stainless steel D-ring. The red diving flag is included to be seen from distance. Made of durable 1050 Denier Cordura fabric.

NEW TALLER VERSION TO ACCOMMODATE THE GARA MODULAR IMPULSE

The Piovra XL is a special backpack conceived for transporting spearfishing and freediving gears. It features a main compartment big enough for storing a pair of long fins (up to 39 in / 100 cm) equipped with a netting for ventilation. It is possible to store a wetsuit, mask, snorkels, belt and various spearfishing gear. Zip closing with 2 zippers with eyelet for padlocks.

The Piovra has a secondary cooler-type compartment for storing cold drinks or fishes.

The front has a zigzag elastic cord with an adjustable locker ideal for quick storage.

Both sides have two elastic bands that are ideal for securing two spearguns. When the bag is empty it is possible to reduce the volume thanks to the lateral compression straps.

The shoulder straps have the buckle chest strap height adjustable. Side handle.

Wear-resistant bottom. Top hook for hanging the bag.

CRESSI SPEARFISHING
2023 COLLECTION

When it comes to spearing fish, the gear a spearfisherman uses makes all the difference in the world. Cressi makes everything the successful spearfisherman needs, from spearguns to wetsuits, dive knives, masks, fins, and more. The brand personality for the Spearfishing line will be reflected in colors that range from seafoam green to deep green/cyan. The green mimics the color of seaweed and underwater forests, perfect colors for Cressi's spearfishing products that date back to the company's beginnings but are always being updated, refined and improved to meet the needs of today's spearfishermen.

COMANCHE RAIL

THE HISTORY OF OUR SPEARGUNS

The Comanche Rail is the latest version of Cressi's world champion spear gun. The high-strength, anti-corrosion aluminum barrel now features an integrated guide rail for increased accuracy. The high-tech and lightweight modern thermoplastic hand grip and muzzle guarantee the utmost maneuverability in the water, adding to the Comanche Rail's accuracy. The compact and hydrodynamic muzzle makes it possible to add a second lower band to increase power for larger prey. The muzzle and handgrip are configured so

the shooter can easily acquire a sight picture of the gun while simultaneously tracking their target. The Comanche Rail comes with a heat-treated 6.0 mm spring stainless steel 17-4 PH notched shaft, 16 mm parallel power bands, metal articulated wishbone, and a shaft rigged to the gun with a 1.4 mm braided multifilament line rated to 80 kg | 176 lb. The Comanche Rail also features a dovetail notch in front of the trigger guard, allowing a reel to be mounted.

APACHE

ROBUST AND MINIMALIST

Apache is Cressi's entry level speargun and can also be handily used as a second gun. This gun is an excellent choice when fishing in holes, around rocks, shallows and where the target is in close proximity. The Apache incorporates a closed muzzle, which helps with ease of loading and improved accuracy. The sealed barrel is anodized for

enhanced corrosion resistance, while the ergonomic molded handle permits easier maneuverability and quick muzzle pointing. The power band is fitted with a standard stainless wishbone and the gun includes the widely preferred Tahitian style flopper shaft.

REELS

DOVETAIL MOUNTING SYSTEM

These reel models are constructed from a single piece of metal which is worked by a high precision lathe. There are no welds to ensure excellent performance and long life. The frame and the central pin are in AISI 316 steel. The drilling on the frame itself allows it to be used also on arbalete spearguns of different brands. The special clutch

provides an excellent closing torque. The assembly system allows easy maintenance and cleaning. All sizes are equipped with a rewinder ring and size R50 is also equipped with an anti-blocking roller. The models R30 and R50 are equipped with a lightened drum in order to weigh as little as possible on the balance of the speargun.

DRY GUN BAG

A beautiful bag for carrying the spearguns. It features an adjustable shoulder strap and a reinforced handle. It has YKK zip closing long 52.5 in | 133 cm. Inside there is a small pocket with velcro closure. On the top, you can roll and close firmly thanks to the adjustable buckles. Thanks to the special coating the bag is waterproof and will protect the equipment

inside. It is long approximately 70 in (179 cm), enough for carrying long spearguns or other equipment. It is an ideal bag for the spearfishing man that want to protect and easily transport his gear.

CODE	CASE PACK

TECHNICAL FEATURES

- 840 Denier Nylon with waterproof coating
- YKK zip closing long 133 cm | 52.5 in
- Dimensions: 179 x 30.5 x 20 cm | 70 x 12 x 7.9 in
- Reinforced side handle and shoulder strap

TECHNICAL FEATURES

- Bag for carrying and protecting the Pneumatic guns
- Allows easy and safe transportation of gear
- Drawstring closure equipped with barrel lock
- Durable sewn fabric construction
- Two sizes available: 75 cm | 29.5 in and 120 cm | 47.2 in

SAETTA

QUALITY & POWER

The Saetta black is the ultimate in pneumatic spearfishing. An upgraded model of the world-renowned Cressi SL series. The Saetta offers unmatched power, comfort and accuracy. A few design tweaks have been able to maximize shot power with high precision and speed. Among the upgrades of the extremely reliably SL series is a new muzzle with incorporated holes to aid in water drainage and a new, soft, angled white handle that also aids in locating the speargun underwater. The Saetta still boasts some of the same successful features of its

predecessors. For one, an anatomical high grip butt that enables the gun to be held in line with the arm. A strong line hook situated on the bottom of the grip butt for shaft loading. Also a safety catch that frees the line: releasing the device, when the trigger is pulled, and lastly, an Ø 8 mm threaded shaft. The Cressi Saetta is the new standard in pneumatic spearguns. The Saetta is available also with the version with the Power Reducer, a lever that reduces the power of the half, in case of close targets.

MADE IN ITALY

SL STAR

THE HISTORY OF OUR PNEUMATIC GUNS

The SL Star range of pneumatic spear guns has been in production for many years now, and they have won worldwide fame for their excellence in terms of robustness, reliability, precision and powerful shooting. The various models correspond to the equivalent models in the SL series, without power reducer. Constantly updated over the years, the SL Star spearguns are ultra light, easy to use, and fire quickly. They come with anatomical

high grip butts enabling the gun to be held in line with the arm with no extra effort. The bright yellow butt means you can identify the gun even if it ends up on the sea-bottom after shooting. A strong line hook is situated on the bottom of the butt for shaft loading. The guns are fitted with a safety catch and, when the trigger is pulled, it frees the line releasing device. Stainless steel shafts are available separately.

FG1

FIBERGLASS MONO-PIECE POLE SPEAR

The FG1 is the ultimate pole spear made in fiberglass to ensure lightness and speed while underwater. Ideal for traveling and perfect for small to medium size fish. The top ends with a male fitting of 6 mm and two spanner flats that allow tightening using a wrench. It features an elastic rubber band made of OD latex tube with a cord inside installed to the hole. A Paralyzer Tip, composed of 3 tiny barb prongs is included.

CODE	CASE PACK
FP015001	5

FG2

NEW 2023

FIBERGLASS 2-PIECE POLE SPEAR

The FG2 is the ultimate pole spear made in fiberglass to ensure lightness and speed while underwater. Ideal for traveling and perfect for small to medium size fish. The top ends with a male fitting of 6 mm and two spanner flats that allows tightening using a wrench. The pole is 182,5 cm | 72 in long and has a diameter of 13 mm. The rubber sling is made using a Ø 9 mm OD latex tube with a cord inside, installed to the hole. The latex tube length is 76 cm | 30 in, cord length is 22 cm | 8.5 in. Total length of 98 cm | 38.6 in. A Paralyzer Tip, composed of 3 tiny barb prongs, 30.5 cm | 12 in long, is included. Underwater fishing is a way of life and must be done responsibly and sustainably for the environment. Choose your prey well and fish only what is sufficient for feeding yourself, respect nature.

FP015002	5

FG3

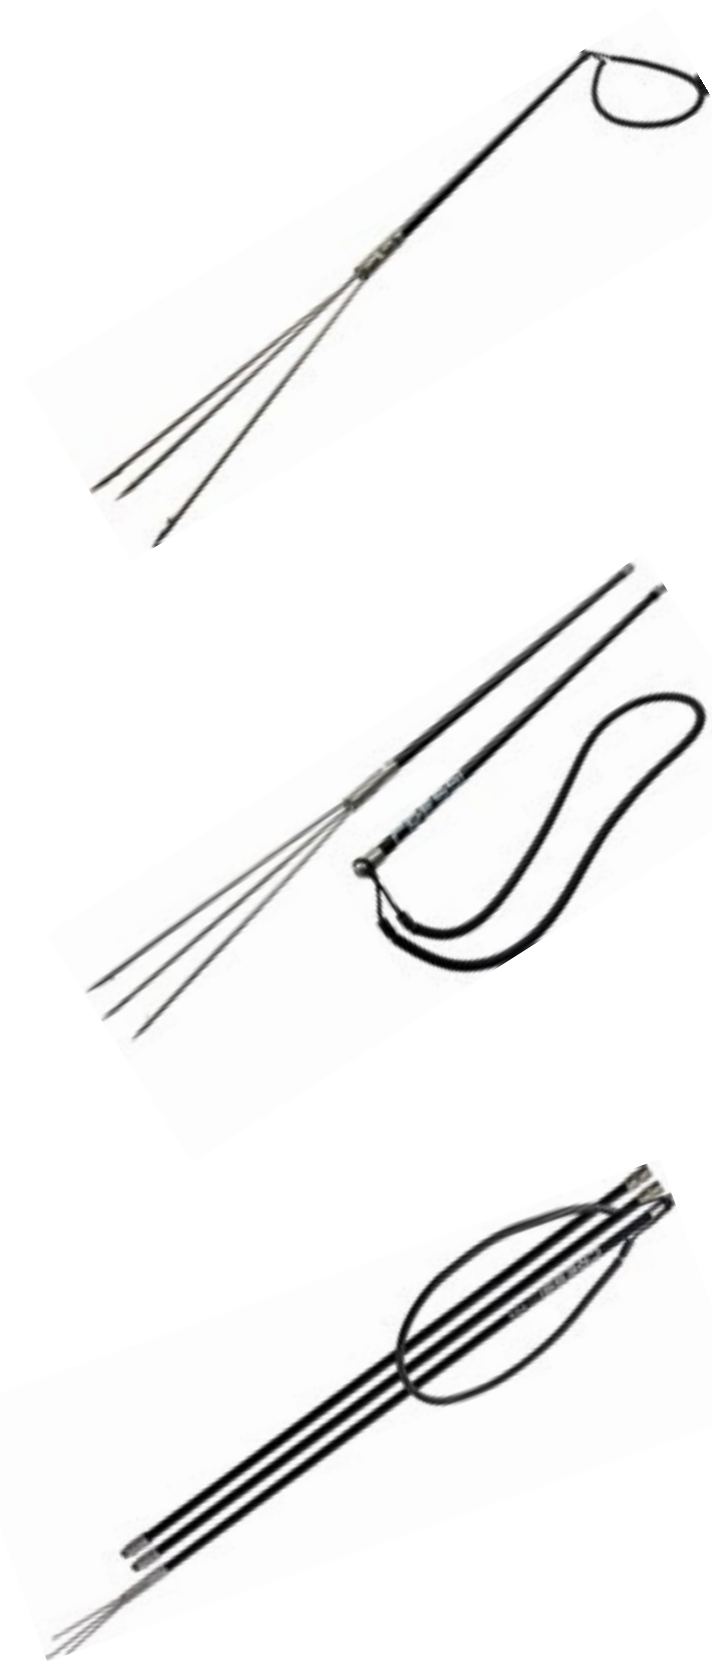

FIBERGLASS 3-PIECE POLE SPEAR

The FG3 is the ultimate pole spear made in fiberglass to ensure lightness and speed while underwater. Ideal for traveling and perfect for small to medium size fish. The top ends with a male fitting and two spanner flats that allow tightening using a wrench. It's composed of 3 pieces that can be assembled as desired. The threaded tip can accommodate different paralyzed tips.

CODE	CASE PACK
FP015003	5

TECHNICAL FEATURES

- Pole spear made in fiberglass for ensure lightness and speed while underwater.
- The bottom end is rounded with a hole for the rubber sling.
- The top ends with a male fitting of 6 mm and two spanner flats that allows tightening using a wrench.
- The rubber sling is made using a Ø 10 mm OD latex tube with cord inside, installed to the hole.
- Paralyzer tip composed of 3 tiny barb prongs, 25 cm | 10 in long, is included.

ALUMINUM

ALUMINUM 3-PIECE POLE SPEAR

The Aluminum pole spear is the perfect solution for traveling hunters. Threaded lightweight sections break down to fit in a typical dive bag and can be quickly assembled once at the dive site. Included is a 3-prongs

"Lionfish Cluster" tip and high-quality power band. Other tips are available as accessories, not included. The 3 pieces modular design gives the possibility to choose different assembling for the spearfisherman needs.

TECHNICAL FEATURES

- Thick-walled aluminum construction for durability
- Threaded joints join quickly and securely
- 3-prong lionfish paralyzer tip included

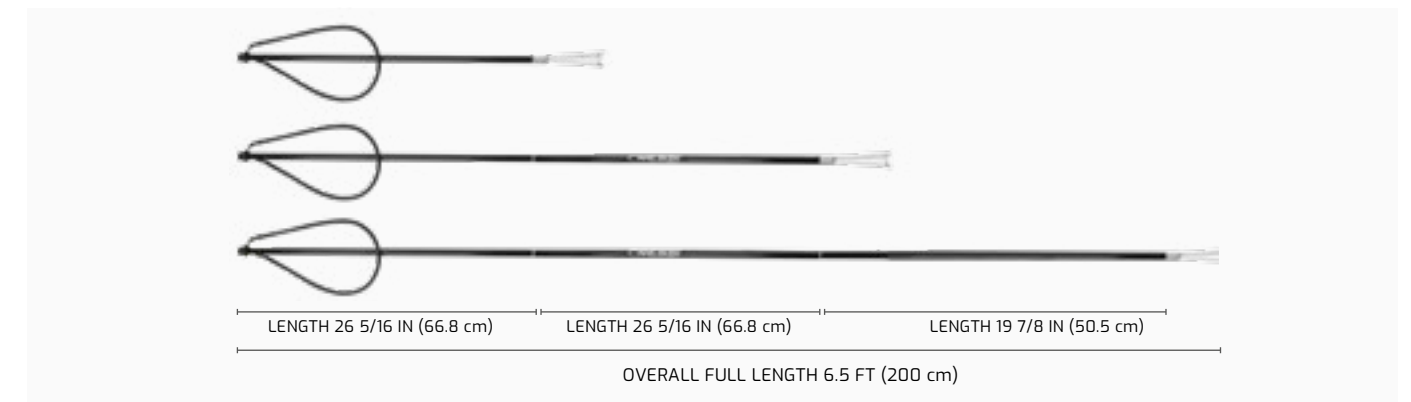

3 PIECES: 6.5 FT LONG FOR NORMAL HUNTING CONDITIONS

2 PIECES: 4.9 FT LONG FOR CLOSE RANGE HUNTING AND LION FISH HUNTING

TORCHES & KNIVES

SPEARFISHING

WHITE COLOR TEMPERATURE | ADJUSTABLE ELASTIC STRAP | EXCELLENT ERGONOMICS | SWITCH WITH 3 POSITIONS | LED LIGHT TECHNOLOGY | PREMIUM MATERIALS | NARROWED LIGHT BEAM

MADE IN ITALY

LUMIA+

ULTRA LED DIVE LAMP

Torch with a highly asymmetric design boasts excellent ergonomics and a highly tactile perception of its geometric characteristics. Thanks to this particular design, the switch position is immediately found without needing to use your eyesight. The porthole and body are coated with thermoplastic rubber to extend shelf life and reduce noises from impact when used for fishing. These ergonomic features are a big advantage over aluminium torches with a circular section which do not give feedback on the position of the grip and, in some cases, even require the use of two hands

to turn it on. The switch has three positions: Off, On Unstable with Automatic Return, On. The "On Unstable" position is particularly useful in fishing because it allows flashing by one simple press. The strap with slider spring allows adjustment according to the user's needs, but being elastic can be pulled out in case of emergency. Power is supplied by four AA batteries, either alkaline or rechargeable. The electronics ensure a constant level of brightness even when the batteries are rechargeable and/or not fully charged. Batteries included.

TECHNICAL FEATURES

- Luminous Flux: 300 Lumens
- Color Temperature: 6500 °K CRI>75
- Burn Time: 3.5 h
- Viewing Angle: 6°
- Illuminance: 30000 Lux
- Impact Resistance: 1.5 m
- Ingress Protection Code: PX-8 75m

NEW WHITE COLOR TEMPERATURE

The LED has a white color temperature similar to sunlight for maximum return of the colors in the underwater environment. The light beam of the LED is narrowed into a spot light beam of about 6° by means of a lens made of ultra-transparent material protected by the polycarbonate optical porthole.

ACTIVE ELECTRONICS

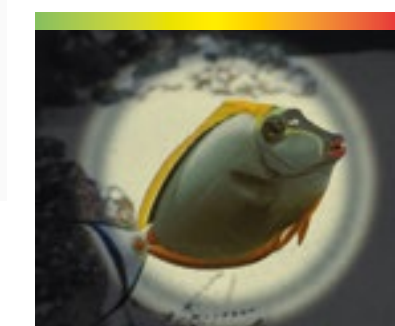

Power is supplied by four AA batteries, either alkaline or rechargeable. The power supply has an electronic management system that eliminates the gap between the different electrical potentials of different types of batteries and ensures an efficiency of 30% higher than the commonly used systems. The active electronics of the flashlight guarantee constant light, even when the battery charge decreases. When the charge drops below the safety threshold value, the lighting level will reduce to warn the user that the batteries are depleted.

Length	168 mm - 6.61 in

LIZARD

NEW 2023

STAINLESS STEEL

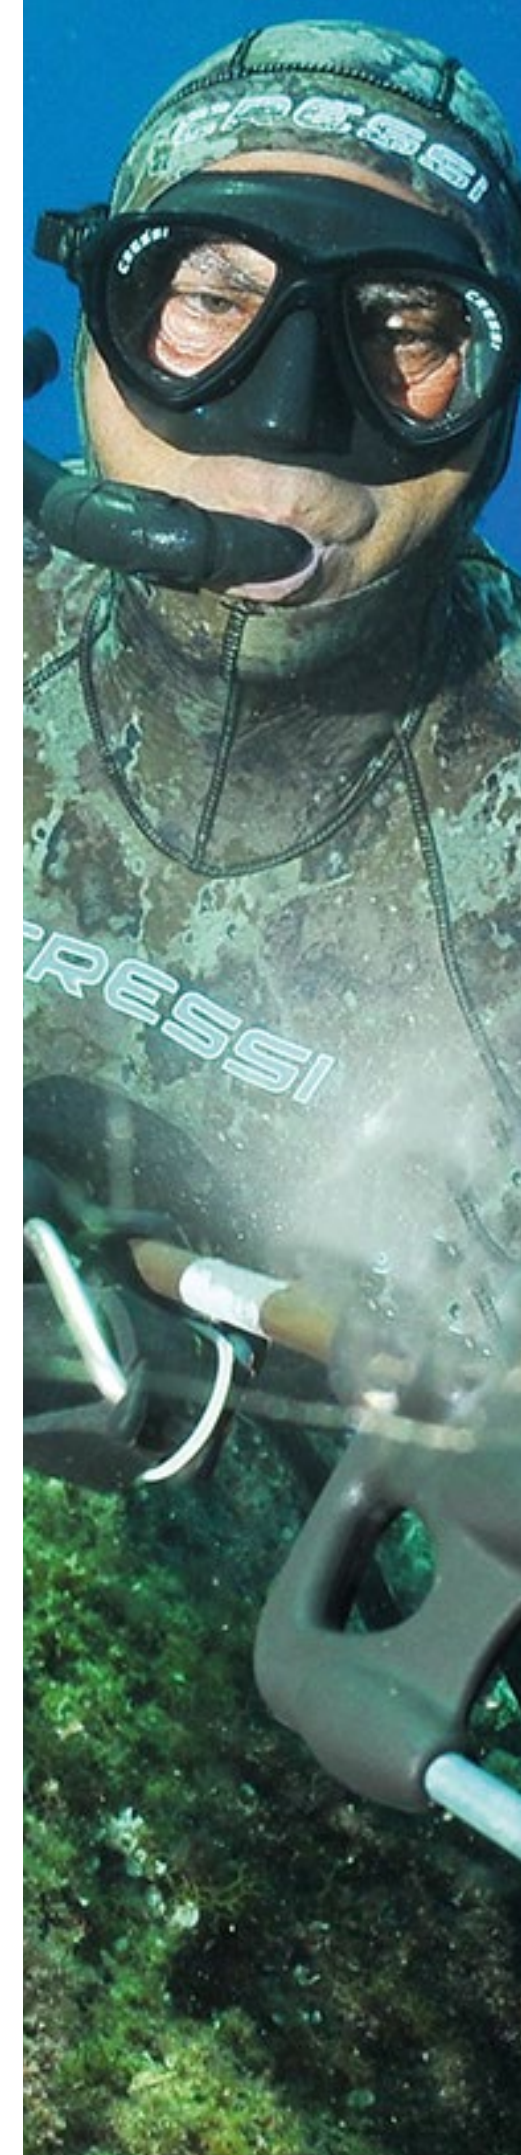

Italian-made professional, multipurpose diver's knife, with blade and handle in w 1.4116 martensitic stainless steel, hardness HRC 55/56, for an extremely sharp and honed blade. A knife with a dagger handle designed specifically for fishing. In the body of the knife a part is intended for the extraction of stranded shafts and for straightening them. The knife can be removed from its sheath quickly and with one hand thanks to a special mechanical system.

CODE	CASE PACK
RC559600	10

TECHNICAL FEATURES

- Made of w 1.4116 martensitic stainless steel, hardness HRC 55/56
- Blade length: 10.5 cm | 4.13 in
- Total length: 21.0 cm | 8.26 in
- Blade thickness: 3.8 mm | 0.15 in

420 JAPANESE 420 STEEL

FINISHER

STAINLESS STEEL

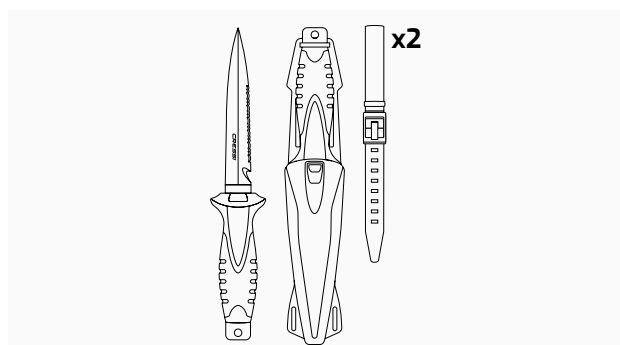

The Finisher is a medium-sized stiletto knife, designed for spearfishing. Handy, great penetration of the blade, resistance, and grip. The blade is extended through the inside of the handle and it has screwed a little pot on the end. It features 420 tempered steel and Black Coating. The blade features one side with a smooth edge and the other with a serrated edge. It has a comfortable grip with a rubbery technopolymer coating and a plastic sheath that is very hydrodynamic with the fixation of the knife by means of a rubber ring.

304 JAPANESE STEEL

BORG

STAINLESS STEEL

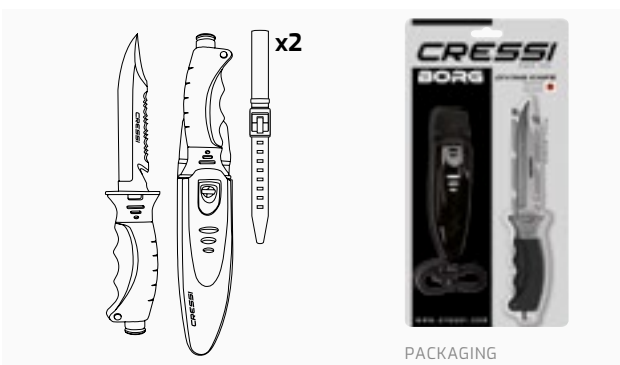

The Borg is a modern, large knife with a futuristic design and a strong, tempered blade. One side of the stainless steel blade is straight-edged, the other one is serrated right along the blade; they are both very sharp and effective for line cutting. The handle has an ergonomic design to ensure a secure grip even while wearing gloves. It is separated from the blade by a small techno-polymer thumb tab. The knife comes with a sheath that features a locking mechanism to allow one-hand release.

NORGE

STAINLESS STEEL

Norge is a modern, compact knife with a futuristic design and a strong tempered blade. The anatomical, non-slip handle is made from soft grip material. It is separated from the blade by a small technopolymer thumb tab. The blade is made from special tempered stainless steel, with a smooth edge on one side and partly serrated on the other. This side of the blade has a line cutter at the handle end. The black technopolymer sheath comes with loops to attach it to leg or at the waist.

KILLER

STAINLESS STEEL

A small knife that's been around for years now, highly appreciated because it is easy to handle and the blade penetrates really well. This is forged from a single piece of stainless steel, and is blocked at the grip by a screw knob situated at the end of the grip. One side of the blade has a smooth cutting edge, the other is partly serrated. The anatomical technopolymer grip ends at the blade with a thumb tab. The sheath is made from plastic and has a traditional elastic band to hold on the knife and loops to attach the knife to your leg or onto your belt.

CODE	CASE PACK
RC554000	10

Blade length	8,6 cm - 3.4 in
Total length	18 cm - 7.1 in

PACKAGING

SUPERTOTEM

STAINLESS STEEL

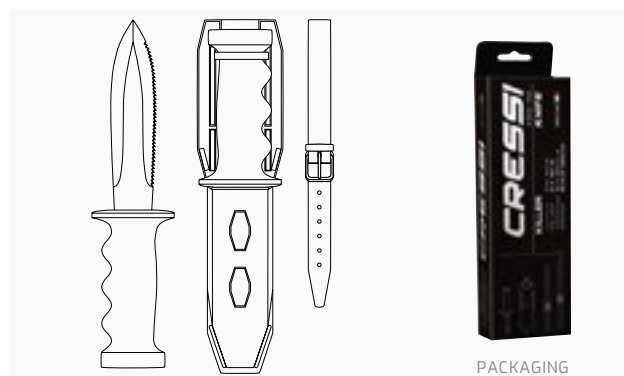

An inexpensive, average-size knife with an excellent quality-price ratio. One side of the stainless steel blade is straight-edged, the other one is serrated right along the blade; they are both very sharp and effective for line cutting. The anatomic grip is made from technopolymers and has a series of moulds for the fingers, ending with a thumb protection tab at the blade end. The plastic sheath holds the knife firmly with a traditional elastic band and has loops to attach it to the leg or strap.

CODE	CASE PACK

SKORPION

| STAINLESS STEEL

Skorpion is a modern knife of last generation design and of medium dimensions, with a resistant tempered blade of tempered AISI 304 steel, with a smooth edge and a serrated edge with a wire cutter incorporated. The handle is anatomically shaped and made of "soft grip" material for a secure grip. It is separated from the blade by an integrated handguard made of technopolymer. Includes a pot in the same material as the leaf. The cover is made of black technopolymer and has straps for fixing to the thigh or belt. The knife comes with a sheath that features a locking mechanism to allow one-hand release. The sheath comes with two, standard issue straps to attach it to your leg.
