BUYER'S GUIDE COLLECTION 2025

EXCLUSIVE ACCESS FOR AUTHORIZED DEALERS

Access is reserved for authorized Dealers. To get started, submit a request, and once approved in coordination with your Territory Sales Manager, you'll receive an invitation email from b2b@cressiusa.com. This grants full access to the platform's resources.

COMPREHENSIVE RESOURCE LIBRARY

The B2B Dealer Support landing page offers a comprehensive library of essential documents, including product catalogs, agreements, and marketing forms. Regular updates ensure that partners always have access to the latest information

KEY PLATFORM FEATURES:

Easy Ordering Experience: Place orders quickly with access to product details, photos, and descriptions.

24/7 Product Access: Real-time inventory and product availability.

Order Management: View order history, shipping information, and manage backorders.

Exclusive Deals: Receive newsletters with specials and outlet deals.

CRESSI UNIVERSITY PLATFORM

CRESSI LMS

(ONLINE E-LEARNING MANAGEMENT SYSTEM)

Bringing all things Cressi to you in a simple and easy to access way. The E- Learning Management system is made to educate our dealers on a wide range of topics such as products, classes, and certifications, all while in the comfort of your home or shop!

CRESSI REBRANDING

In 2022, Cressi began a rebranding initiative led by Marco, the third generation of the Cressi family to guide the company. This effort introduced a fresh, modern look that honors the company's legacy while incorporating new vision into the product lines. Additionally, the company has fostered partnerships with brand ambassadors who embody its values and proudly represent the Cressi family. By 2025, this rebranding extended across the entire product line, communications, and packaging, ensuring all touchpoints align with Cressi's heritage.

CRESSI

We live by the sea, we work with the sea and we love the sea, so it's our responsibility to give it care and respect.

Our goal is to replace all plastic packaging with alternative sustainable solutions following our policy.

2024 SPECIAL MEDIA PROJECTS

SHARK WEEK 2024

Shark Week is seven-day marathon documentation about sharks that airs annually on Discovery Channel since 1988. Every year it features some popular celebrities who go underwater to pay a visit to the apex predator. The last week of July, Discovery Channel's Shark Week is an annual, Jawsdropping spectacle featuring more than 30 hours of original programming about one of nature's most feared predators.

2024 SHOWS SHARWEEK SHOWS THAT TRUST THEIR DIVERS TO #CRESSI1946

- · Jaws Vs Leviathan
- Makozilla
- · Great Whale Fight Club
- · Shark Frenzy: Mating Games
- · Deadliest Bite
- Monster Hammerheads: Species X
- Expedition Unknown: Sharks
 Vs. Nazis In Paradise
- · Monsters of Oz
- · Monster Mako: Fresh Blood
- · Sharks of the Dead Zone

In Cressi we have always focused on sustainability by orienting ourselves to the protection of the environment and especially of our seas. We follow the sustainable direction on many fronts, such as in the choice of packaging materials, where we are reducing plastic and replacing it with recycled or recyclable materials. We are also very active in sponsoring events related to cleaning up the seas to ensure that future generations have our same opportunities."

CRESSI

Cressi has been an American company since 1987, with a strong presence across the Americas, including Canada, the Pacific, the Caribbean, Brazil, and Mexico. Each of these regions represents an important area for our growth and commitment to serving the diving and water sports community. Americas, including Canada, the Pacific, the Caribbean, Brazil,

Exclusive benefits for CDCs:

Creation of a personalized presentation video and resources for social media.

Promotional campaigns on the cressi.com

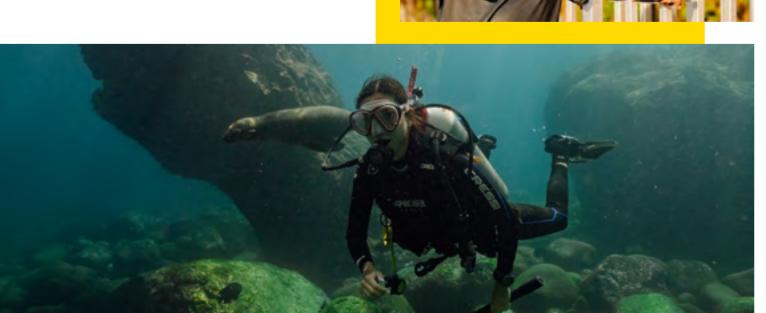

platforms.

Strategic collaboration with CRESSI Ambassadors

to promote your CDC.

Exclusive access to CDC Day, the annual event designed specifically for Cressi Diving Centers. Being a CDC is more than a status—it's an opportunity to position yourself as a leader in the diving industry alongside a globally prestigious brand.

The Cressi Liveaboard Status

is an exclusive recognition that, through an innovative commercial formula, rewards liveaboards that stand out for their image, prime location, and high service standards, exclusively adopting CRESSI products as an integral part of their operation.

Exclusive benefits for Cressi Liveaboard:

Creation of a personalized presentation video and resources for social media.
Promotional campaigns on the cressi.com platforms.

Strategic collaboration with CRESSI Ambassadors to maximize the visibility of your liveaboard. With the Cressi Liveaboard status, you not only position yourself as a leader in the diving industry but also become part of a global network supported by a prestigious international brand.

AMBA-SSADORS

Mexico

ANDREW RAAK

(i) raakbottomimaging

Passionate about all aspects of the marine environment Andrew has worked as a dive professional for more than a decade. He has a degree in Marine Science, a captain's, license and dive instructor certification. He has traveled the world photographing in amazing locations

asiabrynne

I picked up my first disposable film camera at the age of 8 and never stopped shooting. The ocean is a place away from all of the noise, where you don't have to use words. time doesn't exist, and you can share space with animals. Being underwater is a break from the busyness of life.

(O) brookslaich

He's a Canadian former professional ice hockey forward. He played over 750 National Hockey League games. Brooks is a multi-athlete and a sports lover, so what better way to kick off the day? A little snorkel session when the water is calm and fishes and turtles are active

CHRISTINE WEST & ADAM MAIRE Hawaii

(o) christine_regent_west

After working as scuba instructors, adding cold-water diving was the greatest modification to their portfolio. Working together diving on a project in Alaska opened their eyes wide to documenting undersea life in extraordinarily different environments from the warm waters where they began.

(i) gatorboys_chris

I'm born in Florida and have spent my life around the water. I love the freedom, weightlessness, and otherworldly views of diving. I try to use my passion to teach others about aquatic wildlife in the hopes they will learn to love them too, and ultimately help protect these fragile ecosystems.

(i) thesharkdoctor

I'm from a small town located several hours from the ocean. But I always had a fascination with the ocean, a fascination that really came to fruition during my first shark encounter in the Florida Keys when I was 14. My free diving and scuba career began and has been growing ever since.

JASON WASHINGTON

(o) caymanjason

For the past two decades, Jason has been a leader in the Cayman Islands water sports community. A 2017 International Scuba Diving Hall of Fame honoree, Jason's focus both locally and abroad has been on protecting the delicate marine life found in the waters of the C. Islands

(o) mermaid.kayleigh

Kayleigh and Cameron area passionate divers who strives to educate and encourage people to protect our oceans. As a marine conservationist, Kayleigh understands the importance of educating people about ocean conservation. Through her work at One Ocean Diving, she's able to inspire people's in protecting the world's sharks and marine life.

KRYSTAL DORN

(o) krystalklear

Krystal moved to Hawaii, when she began photographing underwater and free diving. She is well known for capturing artistic images underwater, from mermaid photography to conservation awareness projects. Her mission is to help raise awareness for animal species.

LEO MORALES

(c) leomoralesbuzo

For many, scuba diving is an adventurous, recreational activity. For Cressi ambassador Leo Morales, scuba diving was therapy and the pathway to a second chance at life. After surviving a rare form of cancer, it was scuba diving that helped Leo to heal and find a deeper meaning into the

ROBERTO OCHOA

(o) robertoochoahe

Roberto Ochoa is a Videographer for Planeta Azul, he started making wildlife videos at the age of 25 in the Galapagos Islands, Africa and North America. Beneath the world's waters lie landscapes, species, vegetation, and populations as diverse and splendid as those on land.

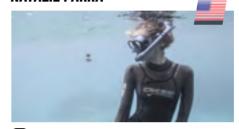

THE BUCKET LIST FAMILY

(i) thebucketlistfamily

The Gee family, just a typical family working from all over the world as Family Travel Journalists! Their story began in 2015, when they decided to sell everything and leave home for a trip around the world. They started an Instagram and YouTube channel called, The Bucket List Family.

NATALIE PARRA

(o) nataliekparra

It felt like flying and I couldn't get enough of it. I started researching, taking courses and learning from fellow free

Steven grew up surrounded by open spaces, farms, and lakes; he loved exploring and seeing animals. His family moved to Florida, which cemented his love for the ocean. Steven is currently in the process of deploying artificial reefs: His nonprofit, The Reef Genesis Corporation, is his

worldwide

I'm from Southern California. I grew up playing in the ocean, but it wasn't until I was visiting the island of Oahu prior to moving there that I tried freediving for the first time.

(o) sevenpayne

VOYAGES OF AGAPE

(o) voyagesofagape

Agápe is a 1984 Tayana Vancouver 42', hull #93. "Agápē" means unconditional love. She is a true blue water cruiser. and has already seen much of Mexico, the South Pacific, and beyond. For us 'Agápe is home. She is a safe and trustworthy vessel that will ferry us to the less seen places of the world.

PIRRY

USA

(O) pirryoficial

Pirry is a Colombian journalist, writer, photographer, documentalist and important influencer that is dedicated good part of his journalist work talking about the Ocean and denouncing problems such as illegal fishing, pollution and many other difficulties facing the seas.

THEO KNEVEL

(O) theoknevel

Theo is a scuba diving and advanced free diving instructor. He joined Cressi following a 10-plus-year career as a frogman in the Special Boat Service. He has been able to spread his passion for diving throughout the Caribbean. He is co-founder and chairman of the War Veterans Foundation

WILLIAM DRUMM

(i) williamdrumm

An alumnus of the University of Colorado at Boulder, I boast dual degrees that celebrate my commitment to our planet – a BA in Journalism, and a BS in Ecology and Evolutionary Biology. In 2021. My domain is the mysterious depth of the sea – I specialize in underwater photography, where every frame narrates the unspoken stories of aquatic marvels.

SCUBALAB

RAFFAELLO NEW COLORY

RECTANGULAR WIDE SCREEN SCUBA DIVING COMPUTER WITH COMPASS

_ RAFFAELLO

BLACK/GREY

Raffaello is a diving computer with a durable, scratch-resistant body and a large, easy-to-read display. It offers essential dive data, including surface time and desaturation time, with a long-lasting battery and user-replaceable feature. The DIVE program utilizes the Cressi RGBM algorithm, allowing for precise dive planning and management of different air mixes. Safety features include oxygen toxicity indicators and alarms for ascent speed violations. The FREE program provides comprehensive data for apnea diving, while the GAUGE program offers essential measurements and resettable chronometers. It features a digital compass allowing to see the cardinal directions or the degrees. It is also possible to set as zero the direction to follow avoiding drifting. The logbook can store up to 50 dives per program, and it includes a deep stage and ascent speed indicator for safe navigation. Reliability, performance, and convenience for divers.

SCUBA DIVING AND FREEDIVING WRIST COMPUTER

A large-screen display dive computer launched in 2020. It has been developed by the subsidiary Cressi Elettronica with the latest technology. It is a computer of completely modular construction, robust, and with a large UFDS screen that inherits the proverbial ease of navigation and menus of computers with Cressi software. The display is made of technical polyolefin and the case is heavy-duty, with a stainless steel button. Water resistant up to 150 m | 492 ft depth. TPU rubber wristband with stainless steel buckle.

GIOTTO **CONSOLE 2**

SCUBA DIVING CONSOLE

TECHNICAL FEATURES

- Polycarbonate and Desmopan materials are
- lightweight and minimize bulk for reduced drag.

 Two connection points, one up top for a clip or bungee and wide loops on the back for connection to any strap, give divers the greatest number of mounting options.
- · Angled console fits naturally in the hand and positions both the pressure gauge and computer for optimal viewing.
- Rugged mini-gauge has a chrome-plated brass case.
 Gauge dial is color-coded in red, green and blue for
- instant readability. Reads pressures to 5,000 PSI (350 BAR). · Console measures 65 mm x 25 mm.

ELITE CASE INCLUDED

The Giotto Console 2 is the union of the Cressi Giotto dive computer with a Pressure Gauge. 2 very important instrument for control your scuba equipment and dive safe. The 3 button Giotto computer by Cressi will provide all the necessary information in regards to depth, dive times, possible need of decompression, ascent rate and all the surface intervals between dives. Nitrogen absorption and release is continuously processed by its sophisticated software, taking into account the quantity of inert gas contained in the different mixtures that can be used. This information is shown on the device's display due to the PCD (Priority Compartment Digit Display) system that allows an easy and direct "dialogue" between the diver and the computer, ensuring a clear understanding of all the data needed at any given time and with perfect readability

GIOTTO CONSOLE 2 (IMPERIAL)

in any situation. The computer is provided with clock, chronograph and calendar, and a versatile dive memory (logbook). The mathematical model of Giotto can make saturation and desaturation calculations of dives carried out both with air and with Nitrox during any moment of the dive. In this last case, you can set all the parameters related to the mixture of our dive: from the maximum allowed PO2 value (between 1.2 and 1.6 BAR), to the mixture's oxygen percentage (FO2): between 21% and 99% of O2. Additionally, the device may be set by the user for either metric (m-ºC) or imperial system (ft-ºF). The Giotto Console can be connected to a personal computer. Polycarbonate materials and smart features make this angled console rugged, lightweight and userfriendly. The Pressure Gauge has a color-coded scale that the divers can read at a glance.

- · Rattenr CR2430 3V Replaceable plastic screen protector
- AIR/NITROX DIVE MODE
- · Cressi RGBM algorithm Complete diving data processor PPO2 1.2-1.6 BAR configuration
- It is possible to select hyper oxygenated mixes up
- Graphic indicator of CNS toxicity level of oxygen
- Safety stop indicator
 Multiple-level safety factor configuration
- Altitude configuration
- Algorithm for managing uncontrolled ascent
 Suitable for repeated multiday decompression diving
- It is possible to alternate between nitrox and air even during desaturation
- · Deep Stop warning can be deactivated
- Alarm in case of breach of ascent speed, decompression or PPO2
- It is possible to disable the ascent alarms
 Current time visible during diving
- Resettable dive settings, useful for renting operations
- Planning scrolling of no-decompression limits
 Maximum dive depth alarm

FREE (APNEA) MODE

- · Display of all diving parameters, depth, temperature,
- dip counter, maximum dive depth, dive time

 Length of the surface interval between each dive
- Length of diving session
- Denth dive time and surface interval alarms
- Maximum dive depth alarm
- · Recovery time alarm
- · Current time visible during diving GAGE MODE (no decompression calculation)
- · Depth/temperature indicator
- Average depth
 Dive time in minutes and seconds
- Resettable depth stopwatch
- · Current time visible during diving

OFF MODE

- · Sensors disabled for snorkeling/swimming activities
- · Memory up to 50 dives per category · Dive session history navigation

INTERFACE

 Software with visualization of the diving sessions (sold separately)

COMPUTER + PRESSURE GAUGE

MADE IN ITALY

DONATELLO DONATELLO **CONSOLE 3**

COMPUTER + PRESSURE GAUGE + COMPASS

The Donatello Console 2 and 3 have been designed to fit the Donatello scuba dive computer in a modern console, robust and easy to handle. It's equipped with an easy-to-read Pressure Gauge, that features a double scale in metric and imperial systems and a fluorescent dial, which glows in low-light conditions. The instruments are arranged on a slight tilt, which further improves the design and allows for greater

readability of the same. The use of advanced materials such as polycarbonate and Desmopan has reduced to a minimum thickness and weight, and the console reveals a surprising lightness, which translates into ease of use and minimum strain on the hose connection to the HP first stage regulator.

An elegant expression of simple, functional design, the Leonardo is a must-have for divers entering the sport and those who "just want to dive." A single-button interface makes it effortless to program Air, Nitrox, and Gauge modes the first time a diver picks the computer up, and an edge-to-edge, high-definition screen give large numerical displays in a computer that is still compact and travel-friendly. The clearly visible battery life indicator and distinct audible alarms deliver critical information as well as peace of mind during the dive. The dive settings can also be reset after each use, making it an excellent choice for rental operations.

LEONARDO 2.0 **CONSOLE 2**

COMPUTER + PRESSURE GAUGE

Make gauge checks fast and efficient with this two-gauge console especially crafted for the Leonardo. Polycarbonate materials and smart features make this angled console rugged, lightweight, and user-friendly. The angled console combines the Leonardo with a brass-housed, mini submersible pressure gauge that has a color-coded scale divers can read at a glance.

TECHNICAL FEATURES

- Polycarbonate and desmopan materials are
- lightweight and minimize bulk for reduced drag.

 Two connection points, one up top for a clip or bungee and wide loops on the back for connection to any strap, give divers the greatest number of mounting options.
- Angled console fits naturally in the hand and positions both the pressure gauge and computer for optimal viewing.
- Rugged pressure gauge has a chrome-plated brass case · Gauge dial is color-coded in red, green, and blue
- for instant readability. Reads pressures to up to 5000 PSI.
- · Console is easy to assemble with each component
- Dimensions: measures 19 x 4 x 6,6 cm | 7 1/2 x 2 1/2 x 1 1/2 in.

BT INTERFACE

BLUETOOTH / USB

The BT Interface is an external docking station to send data to your smartphone or to a computer through a USB connection. Thanks to it, it is possible to
download the dive log and visualize the dive history with the interface software. The software allows to navigate through the performed dives and see the depth and the temperature graph as well as the parameters set and the eventual

alarms that appeared during the dive. The software for PC is downloadable from which avoid to drain the internal battery of the dive computer.

The Digi2 is the digital response to the scuba diving must-have pressure gauge and depth gauge. Developed with the main concept to provide all the information in a compact device, showing the data in digital and large numbers. No buttons, and all the information in one screen. User-replaceable battery with leaking test. Smart cover when unused for battery saving. Impact-resistant ABS housing with thermoplastic rubber cover.

CPD3

COMPASS + PRESSURE GAUGE + DEPTH GAUGE

It's a very important instrument for monitoring the scuba equipment and diving safely. The Compass features a rotating bezel for easy navigation. The SPG has a color-coded scale that the divers can read at a glance. Both instruments are built with chrome-plated brass cases for maximum durability. The textured boot is easy to handle, even while wearing gloves, and can be rigged with a clip or bungee and secured to the diver's BCD for a streamlined profile in the water.

TECHNICAL FEATURES

- Compass with rotating bezel for easy navigation
 SPG reads pressures until 350 BAR | 5000 PSI
- Depth Gauge reads until 70 meters | 230 feet
- Weight of the product (hose included): 456 g | 1 lb
 Compact rubber boot is textured for a sure grip
- The length of the hose is 76 cm | 30 in

COMPASS + PRESSURE GAUGE

Compact and built to last, it combines a Mini SPG and a Compass. Both instruments are built with a chrome-plated brass case for maximum durability. The textured boot is easy to handle, even while wearing gloves, and can be rigged with a clip or bungee and secured to the diver's BCD for a streamlined profile in the water.

MADE IN ITALY

TECHNICAL FEATURES

- · SPG reads pressures until 350 BAR I 5000 PSI. Pressure gauge dial is color-coded for instant readability.
- Compass with rotating bezel for easy navigation.
- Compact rubber boot is textured for a sure grip.
- Two connection loops, one on each side, for attaching a clip or bungee.
- Weight of the product (hose included): 420 g | 1 lb.

PRESSURE GAUGE + DEPTH GAUGE

Compact and built to last, this two-gauge console combines a Mini SPG and depth gauge. The textured boot is easy to handle, even while wearing gloves, and can be rigged with a clip or bungee and secured to the diver's BCD for a streamlined profile in the water.

TECHNICAL FEATURES

- Depth gauge reads to 70 m | 230 ft.
 SPG up to 350 BAR, or 5000 PSI for the imperial
- Pressure gauge dial is color-coded for instant
- Two connection loops, one on each side, for
- attaching a clip or bungee
- Weight of console: 420 g · 14.8 oz

IMPORTANT NEWS

Understanding Reese's Law and Battery Compartment Update for Cressi Dive Computers

Reese's Law requires manufacturers to enhance product safety, particularly regarding coin-shaped batteries, to prevent accidental ingestion.

To comply with this law, Cressi has updated the battery compartments on the following dive computers: Leonardo, Giotto, Donatello, and Michelangelo. The new design now requires a special key to open the battery compartment, ensuring safer handling of the batteries.

User manuals have been updated to reflect this change, but it's important to note that no changes have been made to the functionality or use of the dive computers themselves. These updates ensure compliance with safety standards while maintaining the same reliable performance divers expect from Cressi.

T10-SC CROMO GALAXY-R

Very high-performance regulator, engineered in Italy with the best technology available. Ideal for seasoned or professional divers who need extremely high performing equipment that is both simple and resistant, without any of the usual accessories that may get damaged. The T10-SC features a watertight chamber designed for cold water use. Chrome finishing. The Galaxy-R features the adjustable inhalation effort knob on the left side.

- Removable mechanics
- COMBINATION PERFORMANCE • Average cracking effort: 3.5 mBAR | 1.41 in wc • Average breathing effort: 0.6 J/l

2ND STAGE

MASTER BALANCED T10-SC PVD

This regulator is a top choice for diving professionals, offering excellent performance, ergonomic design, and easy maintenance. Instructors, guides, dive operators, and researchers will appreciate its versatility. What sets it apart is the unique first stage design, featuring a perpendicular "T" configuration that enhances compactness and lightness. This design seamlessly integrates with the valve profile, providing divers with greater head movement freedom. It also optimizes hose placement, minimizes space usage (especially in cold-water SC versions), and simplifies inspection and maintenance. The regulator boasts a larger, high-efficiency conical filter, easily accessible valves on the tank, and a robust metal body protected by a durable PVD coating, making it highly resistant to wear and tear from dives. When combined with the Master Cromo 2nd stage, equipped with an internal

heat exchanger, this regulator stands out as the ideal option for divers venturing into the harshest cold-water conditions. Its sleek satin chrome finish not only adds durability but also aesthetic appeal. It incorporates a pneumatic compensation mechanism that ensures a consistently smooth and exceptional airflow, delivering precisely calibrated air without relying on an exaggerated Venturi effect. For added convenience, the knob includes a nut for fine-tuning the breathing effort, allowing divers to customize their experience to perfection.

 High-capacity conical filter in chemical nickel-plated spherical bronze
- Removable nozzle in AISI 316 steel
- Hyperbalancing system
- Anti-pressure drop pneumatic spring
 Stainless steel calibration spring with micropeening
- Low-friction technopolymer slider shaft
 Quantity of air supplied: 4,500 Vmin 159 cu ft/min

2ND STAGE

- Adjustable pneumatical balanced
- Adjustable Venturi Adjustable inhalation effort
- Patented elliptical diaphragm
- Patented low-friction lever
- Air delivery system without injector Adjuster knob coated with PVD process with dual OR
- Laser-etched titanium front piece
- Internal heat exchanger
- Cap opening with cam-lock
- Noise-absorbing technopolymer body
- Removable technopolymer deflector
- Removable mechanics

COMBINATION PERFORMANCE

- · Average cracking effort: 1.41 in wc | 3.5 mBAR
- Average breathing effort: 0.6 J/L

CERTIFICATION: EN250/2014 FOR COLD WATER

1ST STAGE

2ND STAGE AC25M

MASTER CROMO

INT VERSION

The AC25 is the third generation of Cressi's IP adjustable balanced piston first stage. It features 2 high-pressure ports and 5 low-pressure ports. 4 lowpressure ports are located on a rotating turret that ensures that regulator and instrument connections are always in the right position. The fifth port is a co-axial Hi-Flow port and is located at the top of the turret. The rotating turret swivels on 360° axis and features 5 low-pressure ports designed to allow the use of more connections without interfering between them. It features the external direct IP adjustment system that

can be set using a simple Allen key. The hi-flow conic shape filter is the same for INT and DIN. The spring and the spring bush are coated preventing rust. Its technologically advanced design delivers consistent intermediate pressure and high performance even with low tank pressures. The AC25m features a matte finish, in gun metal-coated brass. It is combined with the Master Cromo, the pneumatic balanced 2nd stage that features an elliptical shape and a lateral knob for Venturi adjustment.

INT VERSION HOSE INCLUDED: 946 G | 2 LB 1 OZ 803 G | 1 LB 2 OZ DIN VERSION HOSE INCLUDED:

To obtain extremely high performance in low-temperature environments, the second stage has been designed with the special thermally conductive Thermoplastic Neopolymer which can transfer heat like metal while preserving the design flexibility, chemical resistance, and properties of physical and mechanical properties of a conventional thermoplastic. This drastically reduces weight while offering thermal conductivity equal to that of metal cases. Thanks to this material and a specially designed purge valve it passes the EN 250 cold water test.

"ZEN is a state of calm attentiveness where actions are guided by intuition rather than by conscious effort."* This is our ZEN of diving—you become one with the water, calm, attentive, breathing in and out intuitively without effort. This regulator offers an ultra-lightweight and compact design to minimize jaw strain even during long dives. Paired with our AC5, a piston-controlled first stage, it represents simplicity, robustness, and reliability. Maintenance is straightforward, fast, and cost-effective thanks to an ergonomic design that allows quick disassembly and reassembly without specialized tools, reducing downtime and maintenance costs. The ZEN/AC5 features an optimized design for maximum airflow and a extra large conical filter for improved filtration in both DIN and INT versions. Enlarged water passage slots ensure efficient rinsing, providing smooth, clean functionality and a true ZEN state of mind.

COMPACT

TOTAL WEIGHT

INT VERSION HOSE INCLUDED: 923 G | 2 LB 0.5 OZ

Ideal scuba diving regulator for beginners and travelers at an affordable price. Piston 1st stage plus a compact single-hull second stage. Simple piston 1st stage, a "work mule" that is affordable, simple, reliable, and robust, suitable for intense use. Greatly simplified single-hull 2nd stage made of ABS + elastomer of really compact size and extremely light. Its mechanism and development are perfectly planned to obtain the minimum number of components and great strength. Appreciated by dive centers and professional companies who consider it to be a very rentable tool, due to its low cost and practically nonexistent need for maintenance, as well as a surprising level of performance.

MG BALANCED

It is a pneumatically balanced valve designed with a Venturi effect adjustment switch, Cressi's patented elliptical membrane diaphragm, and a patented low-friction lever. The Octopus regulator air delivery system without an injector has an internal heat exchange, a cam-lock system to open

the case, and a body in noise-absorbent techno Polymer. Removable techno Polymer deflector and removable mechanical parts. The hose is extremely light and flexible. The hose and the purge cover are in bright yellow color for easy identification in an out-of-air emergency.

REGULATOR SERVICE & REPAIR

REGULATOR **MOBILE TEST BENCH**

Portability and convenience: the mobile test bench is designed with convenience in mind. With its compact and mobile form factor, you can take it wherever your diving explorations lead you. Whether you're at a dive shop, on a liveaboard, or preparing for a dive on a remote beach, this test bench is ready

mind during every underwater adventure.

Precision calibration: achieve unparalleled accuracy with our meticulously crafted adjustment platform. Equipped with high-precision gauges and tools, you can fine-tune your scuba regulator to perfection, ensuring optimal performance at various depths and conditions.

Robust construction: built to withstand the rigors of diving environments, our test bench is constructed from durable and corrosion-resistant materials. It can endure exposure to saltwater, sand, and other harsh elements, guaranteeing longevity and reliability.

User-friendly indicators: yhe intuitive design of the test bench simplifies the adjustment process. Clear, easy-to-read gauges and user-friendly controls ensure that can operate it effortlessly.

Safety first: the safety is paramount. Our mobile test bench aids in conducting thorough safety checks and adjustments, enhancing your regulator's performance to minimize risks while diving.

Portability and storage: the collapsible design of the test bench allows for convenient storage and transportation. It's designed to fit seamlessly into your dive gear collection without taking up excessive space.

Trusted by professionals: the mobile test bench has earned the trust of dive instructors, dive shops, and service technicians worldwide. Its reliability and accuracy make it an essential tool for those who demand the best from scuba equipment.

REGULATOR SERVICE & REPAIR

SERVICE TOOL KIT

CONTAINS THE MOST IMPORTANT TOOLS

A practical tool kit that contains the most important tools for doing the maintenance and service of the regulators, BCD, and spearguns. The Libra is a practical bag for storing and carrying tools and thanks to its card pouch it can be personalized. The following tools are included in the kit:

HZ709002 Spanner for the first stage seal chamber HZ709004 Extraction Point Tool for 1st Stages

HZ709008 Threaded bar to tighten the 1st stage in the vice

H7709009 Nut driver 5.5 mm

HZ709012 Socket wrench remover tool

HZ709013 Small compass spanner for 2nd stage

HZ709019 Removing HP Seat for AC2 1st stage HZ739001 Universal push tool

HZ739002 Ogival Tool O-ring Bullit for 1st stage H7739003 Pin spanner

IZ750102 Square Driver for BCD Inflator IZ750103 BCD Inflator Schrader Valve Stem Tool

DYNAMOMETRIC WRENCH SET

DYNAMOMETRIC WRENCH + FULL SET OF ACCESSORIES

It is designed for scuba diving regulator maintenance and is a premium tool engineered for precision and durability. Unlike many cheaper models requiring frequent recalibration, this advanced wrench features a cutting-edge, selfstabilizing torque mechanism that ensures consistent accuracy without requiring annual adjustments.

Its high-grade construction guarantees reliable performance under the demanding conditions of diving equipment maintenance, while its ergonomic handle provides a comfortable grip for precise torque application. Ideal for professionals and enthusiasts, this tool eliminates the hassle of recalibration, saves time, and ensures that your regulators are always adjusted to exact specifications, contributing to safety and performance.

AQUAWING MAX

AQUAWING MAX

Aquawing Max is the one-size donut jacket designed to adapt to all anatomies (male and female) using the new patented mas (modular adjustment system): the single 50 mm belt that embraces the shoulders and waist can be rapidly adjusted to your size. The bag's profile is designed to ensure perfect buoyancy with a single tank, and the increased volume generates a buoyancy of 170 N, making the Jacket particularly suitable for dives with increased ballast, such as in cold water to compensate for the high thickness of wetsuits. The anodized light alloy backplate reduces the

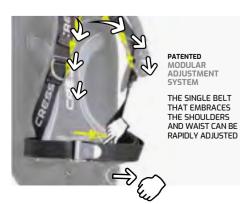

overall weight of the jacket while guaranteeing
stability and safety in use. The special cylinder
rest in thermoplastic rubber integrated with the
back of the jacket guarantees the positioning
of the tank for optimum trim. The shoulder
straps and back cover are made with an air-net
material to enhance comfort and improve water
drainage. The jacket is equipped with two weight
pockets attached directly to the back plate in
correspondence with your flanks. The back cover
is equipped with a special pocket designed to house
the decompression buoy.

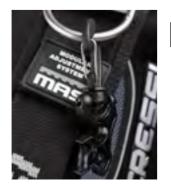

stability and safety in use. The special cylinder

HIGH VOLUME HYBRID INFLATION B.C.D.

COMMANDER EVOLUTION

It is an impressively light high-buoyancy rear-mounted BCD, anatomically designed for maximum comfort and wearability. Its main features are its detachable harness and air cell. The rear-mounted air cell interferes neither with the main underwater component nor the adjustment straps, not even when it is inflated to the maximum. This means extra freedom of movement and buoyancy for the diver. The special air cell compression strap guarantees extra quick deflation and volume control. The ultralight rigid back plate with its integrated carrying handle ensures optimal stability. Its integrated Cressi Flat-Lock-Aid weight system makes it extra easy to release the pockets and rear ballast bags (attached to the tank-block band). Accessories include four 50mm shoulder aluminum D-rings and four 25mm aluminum D-rings (of which two on the pockets and two on the lower part of the harness). There are 3 pressure relief valves: one on the upper part of the hose, one reel-operated valve on the right-hand side of the shoulder, and a third on the lower righthand side of the air cell.

BCD with an exclusive design and technical solutions that ensure perfect buoyancy and a snug profile. The shoulder straps have 50 mm pivoting buckles, offering maximum comfort during movement. The lower strap of the shoulder strap is connected to a ring that allows rotation and thus maximum adaptability. The inside of the jacket is entirely made of air-net material, with extra padding to increase comfort and promote water drainage. The 2-piece waistband system uses the new patented SPWB (self-pivoting waistband) system. The backrest, which is semi-rigid, soft, and padded, allows it to be folded and carried compactly. The Integrated Flat Lock ballast system makes it much easier to remove the weight pockets. There are 2 pockets on the back for weight distribution and always achieve the optimum buoyancy position.

SPWB

_ ELETTRA

ELETTRA SPECIFICALLY DESIGNED **FOR WOMEN** SPWB

The jacket has been conceived to adapt to the female anatomy. The exclusive design and technical features provide perfect buoyancy with a close-fitting profile. The 40 mm buckles (shoulder-waist) adapt perfectly to the female anatomy. The lower band of the shoulder strap is anchored to a ring to ensure rotation and therefore maximum adaptability to the female anatomy. The internal part is fully lined with air-net material, with thicker padding to increase comfort

and improve water drainage. The two-piece waistband uses the new patented SPWB (Self Pivoting Waist Band) system. The soft and padded semi-rigid back plate permits the BCD to be folded and transported with the minimum possible volume. The Cressi Flat Lock integrated ballast system makes the extraction of the weight bags particularly easy. The jacket's two integrated cylinder supports improve the diver's trim.

XL	150	15.3	33.7

The jacket is an impressively light high buoyancy rearmounted BCD, anatomically designed for maximum comfort and wearability. Its main features are its detachable harness and air cell. The main innovation is the orientation of the ballast pockets. Instead of being horizontal and taking up the space intended for the pockets, they are located vertically in line with the tank, behind the pockets, and perfectly integrated into the profile of the jacket. Having them aligned with the body and perfectly located on both sides will dramatically increase buoyancy control, increasing stability and facilitating any movement.

The rear-mounted air cell interferes neither with the main underwater component nor with the adjustment straps, not even when it is inflated to the maximum: this means extra freedom of movement and buoyancy for the diver.

The special air cell compression strap guarantees extra quick deflation and volume control. The ultralight semi-rigid harness ensures optimal stability and high comfort with its air-net fabric. Its integrated Cressi Flat-Lock-Aid Weight system makes it extra easy to release the pockets.

TRAVELIGHT

TRAVELIGHT TM

FLEXIBLE PADDED BACK INTEGRATED WEIGHT POCKETS

It is designed as a super-serious travel BCD. The basic design was drawn from the Cressi Flex BCD the first worldwide travel BCD in the Scuba Industry. The dry weight of travel light is only 2.7 kg | 6 lb. The back is amply padded, for a comfortable fit. It uses the Cressi's Lock-Aid Integrated Weight System and can store 9 kg | 20 lb in the front pockets and a further

PINK

4.5 kg | 10 lb in the no-detachable back pockets. With an eye on keeping the weight down, all of those D-rings are made from a lightweight material. The air cell inflates away from the body which avoids constricting the diver.

operations very easy and intuitive. Fully redesigned in 2015, the Aquaride offers the best you really need for your dive experience. It has been considered the only BCD in his test group to earn solid very good scores in all performance categories for 2 years. Passed and placed first in all tests thanks to the size range, efficient adjustments, and its super-stability at depth. In the final countdown for Testers' Choice, it earned almost twice as many five points as its closest

The Patrol BC is an impressively lightweight, rear inflation BC that is anatomically designed for maximum comfort and durability. The special air cell compression strap guarantees extra quick deflation and volume control. The ultralight rigid back plate with its integrated carrying handle ensures optimal stability. The Patrol also features Cressi's Flat-Lock-Aid integrated weight system that makes it easy to

release the pockets. There are 3 pressure relief valves: one on the upper part of the hose, one valve on the right-hand side of the shoulder and a third on the lower right-hand side of the air cell. The Patrol also features plastic D-rings to help reduce weight and the shoulder and the waist harness is fully adjustable to one full size up or down from the stated size.

The Solid Plus is an evolution of the Solid model to offer greater safety and convenience for the dive center and divers. Equipped with the new Quick Lock System weight release system, it allows quick and safe one-handed release of ballasts. Made of 500-denier Cordura externally and 420-denier nylon internally, it offers strength and durability, and the back features a colored band to increase visibility in the water and protect the jacket from abrasion.

handle, whistle integrated into the sternal buckle, three exhaust-suppression valves and practical technopolymer D-rings; Adjustable shoulder straps with 50 mm buckles ensure an optimal fit and clearly display the jacket size, offering great convenience in rental activities. Solid Plus is the Cressi proposal for top dive centers looking for a superior jacket in rental and school activities.

Equipped with a super-light rigid back with carrying

ORIGIN HD

HIGH DENSITY FIN

HISTORIC LEGACY WITH MODERN **TECHNICAL UPGRADE**

CARLOS GODOYTechnical Manager Soft Goods

NEW2025

WHY

Origin HD and LD fins are designed to meet the needs of divers who use fims intensively, offering precision, strength and negative or positive buoyancy, respectively.

WHAT MAKES IT DIFFERENT?

Origin fins carry on the historical legacy of the RONDINE US COMMANDO fins with a modern technical update. Their construction characteristics make them perfect for:

HD: use with a drysuit and medium-heavy

LD: perfect for wetsuits and medium-light equipment.

WHERE IS THE INNOVATION?

Origin fins are distinguished by their excellent maneuverability, regardless of finning style. They are equipped with self-adjusting springloaded stainless steel straps with a wide grip, offering unprecedented customization. Construction from a single, highly abrasionresistant material guarantees exceptional strength and durability.

In 1950, long before technical diving was a concept, Cressi revolutionized the scuba diving world with the introduction of the vented RONDINE COMMANDO fins. These fins were originally designed for the U.S. Military Underwater Demolition Team (UDT) and saw extensive use in the 1960s. Today, the ORIGIN fins carry forward this historic legacy with a modern technical upgrade. The heavy-duty requirements of technical diving align perfectly with these durable, abrasion-resistant fins made from a single material.

Staying true to the original designs and patents, they offer either a positive or negative rubber versions. The ORIGIN HD is a high density material which is slightly negative, perfect for the use with drysuits and mid- to heavy gear.

environments Ergonomic foot pocket with spring-loaded straps for ease of use with cold hands or thick gloves

· The vented blades are short and wide, providing a very strong forward thrust

 Great for flutter kicks, frog kicks, helicopter turns and overall maneuverability

• Two attachment points when accessing the dive

site or vertical storage

Self-adjusting spring straps as standard

The angled buckle keeps the spring straps in an

optimal position over the heel cap

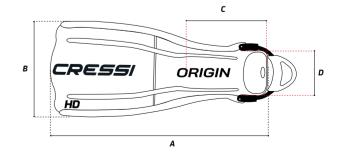

• The simple pin design allows the straps to be

easily replaced if necessary

TECHNICAL FEATURES

MADE IN ITALY

- · Made using the exclusive 3-material injection
- system patented by Cressi
- Foot pocket increased by 5% Under blade foot pocket
- Very fast transmission of the applied energy
 Great structural rigidity

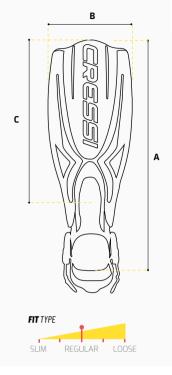

Cressi has developed this special strap to meet the needs of the most demanding divers, who need a comfortable fastering for their foot but one that is still practical and manageable. Its special amply sized slot makes it very easy to put on even when wearing thick glowes or three-fingered glowes for winter water. The wrapping section is highly flexible, making adjustments unnecessary, and as a result it's much easier to get all your equipment right in the first few meters of your descent and the fin stays in place against your foot despite the increase in hydrostatic pressure.

REACTION EBS

TECHNICAL FEATURES

- · Made using the exclusive 3-material injection

- Mode Using the exclusive 3-thatelatin fection system patented by Cressi
 Foot pocket increased by 5%
 Under blade foot pocket
 Very fast transmission of the applied energy
 Great structural rigidity

YELLOW/SILVER

BLACK/SILVER BLUE/AZURE

Cressi's most technically advanced fin, the Reaction uses a completely new polypropylene blade material that is more reactive, flexible, and trimmer than previous designs. It kicks easily yet powerfully and is suitable for divers of every experience level. The long blade efficiently transfers energy from the computer-designed foot pocket, and like other Cressi fins, the blade extends from the top of the foot pocket to maximize its effective surface area for more thrust. Other innovations include new locking strap buckles and noslip material for better traction out of the water.

The Frog Plus features many of the great characteristics of a traditional paddle fin while introducing a revolutionary new blade material that is both extremely durable and nearly indestructible. The Frog Plus utilizes Cressi's patented three material injection molding process. The three materials consist of a nice comfortable rubber on the foot pocket that extends up the side rails of the blade. The second material is the revolutionary new dual density techno polymer which forms the blade, and in conjunction with the third silicone-based material, creates a channeling effect. The channeling effect is the characteristic of the fin that enables a high level of energy to be transferred in both up and down strokes of the kick pattern. The Frog Plus also incorporates Cressi's patented positioning of the foot pocket below the blade. This design increases the working surface area of the blade by 20%. The combination of the channeling effect and the foot pocket mounted beneath the blade creates a very powerful and efficient fin with minimal leg strain. Because of these characteristics, the Frog Plus fin is an ideal choice for the entry-level to advanced diver.

These highly responsive blades are also very lightweight, and a great choice for traveling divers who want an open-heel fin. The dual-material blade balances power with kicking comfort, and full-length side rails help it track naturally through the water using a standard scissor kick. The soft elastomer foot pocket is shaped for an ergonomic and comfortable fit.

TESTERS CHOICE

GARA MODULAR SPRINT

29° DEGREE ANGLED INTERCHANGEABLE BLADE

The Gara Modular Sprint fin, part of the Cressi Gara line, is a 2020 model. It's a shorter alternative to the popular Impulse fin, favored by freedivers worldwide, including professionals and amateurs. Sprint is tailored for winter freediving and situations where the longer Impulse isn't needed.

Both fins are meticulously designed using advanced finite element software, allowing for highly complex and high-performance sections. The Sprint's blade is crafted from a single thermoplastic elastomer, featuring an angled sublayer and an overlay. The sublayer covers most of the fin, providing uniform thickness and a flexible, longitudinally variable propulsion wing.

In contrast, the overlay selectively covers the propulsion wing, with thickness tapering towards the blade tip. This innovative design stores and releases elastic potential energy, greatly aiding the freediver's leg movement, resulting in improved propulsion. When disassembled, the fin's blade and foot pocket occupy the space of a standard snorkeling fin.

INCLUDED GARA MODULAR INSOLE

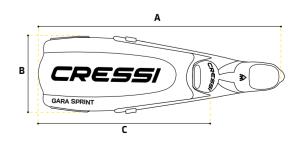

The insole for Gara Modular fins is recommended for use with thin boots in temperate waters, because it improves the kick performance. The semi-rigid material of the insole is completely recycled. The insoles are supplied as a pair (right and left foot) and can be cut into their shape in three different sizes, according to pre-printed guidelines.

REACTION PRO

FOOT POCKET FIN

The Reaction Pro is a full foot pocket style fin, with a long blade and built-in runners to effectively direct water flow down the blade. The Reaction Pro is constructed using multiple materials, bonded together with our patented three-material molding process. This provides comfort and suppleness in the foot area as well as strength and rigidity in the heel and blade for added power and efficiency. The soles are completely covered in thermo-rubber to give them exceptional grip on boat decks. Can comfortably be worn with or without dive socks.

It is a great all-around fin for scuba, snorkeling, and freediving.

PRO STAR

FOOT POCKET FIN

PRO STAR

YELLOW

BLACK

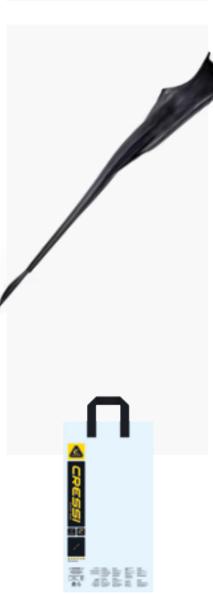

It is a truly versatile fin, an exceptional choice for scuba, snorkeling, and freediving. Inspired by the Pro Light, the Pro Star is a lightweight and comfortable foot pocket-style fin. For power transference, it incorporates the blade beneath the foot pocket and the angle of the blade provides the ultimate efficiency during the kick cycle, requiring less energy to load the blade. This fin is constructed using multiple compounds bonded together to provide comfort around the foot, yet strong enough to transfer strength where needed.

FREE FROG

The Free Frog is back! The fin has been remade with the new molding technology. The foot pocket has been improved to fit better to most different foot shapes.

The Free Frog enjoys the exclusive characteristics of the Cressi diving fins maintaining the spirit of the legendary Frog. It features a below blade foot pocket in order to have a bigger surface that increases the kicking thrust. It is manufactured in a variant of low-modulus polypropylene that, combined with a particular structure, combines a great flexibility, softness, and resistance to a demanding use (even in rental and instructional facilities), durability and an unprecedented aesthetics in fins projected with this philosophy.

CRESSI PATENTED TECHNOLOGIES

*

INNER MEMBRANES + HEAT EXCHANGER

A new generation of cressi masks: Quantum, Zeus, Naxos and Prisma

NNER MEMBRANES

A patented membrane surrounding the inner nose pocket (1) and both the inner eyes pockets (2) which acts as a barrier and traps any moisture escaping from the diver's nose involuntarily when breathing through the mouth. The result is that not only is the moisture channeled away from the lenses, thus avoiding the fogging up of them, but it also reduces the need to compensate for pressure.

To further improve the anti-fog effect, Cressi suggests, the first times that the dive mask is used, to spray some anti-fog solution or to apply some saliva on the inside of the lenses and then to rinse them with water.

EAT EXCHANGER

The external part of the skirt features a cooling system composed of two small heat exchangers that act as radiators (3). Thanks to this system, the temperature inside mask drops, coming closer to the external temperature and the droplets of humidity are trapped before the air reaches the lenses, preventing them from fogging up.

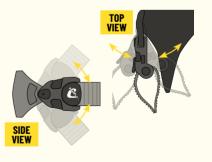

Cressi has developed and patented in 2001 a particular mask frame that to solve the problem of the divers not being able to easily see the scuba equipment. A scuba diver carrying many different pieces of equipment, some of them are vital like the pressure and depth gauges.

The solution has been found designing a new frame shape that is inclined downwards. Moreover, the shape of the lens is designed like an inverted teardrop increasing drastically the downward visibility.

The patented technology is to provide a mask for aquatic activities that avoid loss of watertight during strap-tightening by a diver when the mask is in use underwater. The object of the invention is to avoid exertion of a tensile force or stress during mask adjustment and, in turn, rupture of the skirt. The buckles are not directly fixed to the frame but anchored to the rubber of the skirt, allowing it to freely swivel and pivot in all directions. The buckles are joined with lateral sides of the frame by brackets extending from the lateral sides. The brackets are made of a selected flexible material. This features facilitates the mask storage when not in use.

The Patented Integrated Dual Frame Technology consists of the joining of two rigid frames, the first on the rear of the silicone skirt and the second, anterior to the first one, that support the lenses. When the two frames are joined and locked together, the silicone skirt remains locked in the middle to guarantee a perfect seal between the face piece and the lens.

This technology produces a drastic reduction in the internal volume, while keeping the lenses close to the eyes to ensure a wide view laterally and in the lower zone. The result is a mask with an extremely hydrodynamic shape and low volume.

QUANTUM PRODUCT UPDATE

NEW REVOLUTIONARY ANTI-FOG SYSTEM

The Quantum mask introduces a groundbreaking innovation. It enhances downward vision while effectively preventing fogging by internally regulating warm, damp air exiting the nose. This air is channeled by a system of membranes set in the molding around the eyes and nose and deviating the flow towards the rubber skirt rather than the lenses. The external part of the skirt features a cooling system composed of two small heat exchangers that act as radiators. The effect is that the temperature inside the mask drops, coming closer to the external temperature and the droplets of humidity are

trapped before the air reaches the lenses, preventing them from fogging up. Despite the presence of the small internal membranes deviating from the airflow and the external heat exchangers, the body of the Quantum mask is nonetheless compact and it represents the most advanced design offered on the underwater vision market. The lenses are not treated chemically and it should be remembered that when the mask is new, as is the case with all masks, we advise cleaning the lenses carefully with water and proper detergent for dive mask lenses.

NEW COMPACT ANTI-FOG SYSTEM

A | 120 mm - 4 13/16 in

TECHNOLOGIES

FEATURES DETAILS: Pag 121 **INNER MEMBRANES** + HEAT EXCHANGER

Following Cressi's patented Stop-Fog system the

Naxos is the last entry-level with this innovative

feature. It is compact and smaller in size than a

classic diving mask, but this unique feature does not

reduce the field of vision, and thanks to new internal

ribs, it adapts perfectly to any anatomy of the face.

Naxos, like Quantum, not only offers increased

downward vision but also avoids the phenomenon

of fogging by thermoregulating the warm, moist

air escaping from the nose inside the mask. This is

channeled by a system of membranes in the mold

around the eyes and nose, which deflect the flow

toward the rubber walls and not toward the glass.

ZEUS PRODUCT UPDATE

NEW BUCKLE WITH LARGER BUTTON I DOUBLE INJECTION SILICONE STRAP

Zeus is the perfect mask for diving. This mask has a particular tapered structure deriving directly from the highly popular Nano-mask patent. The same IDF (Integrated Dual Frame Technology System) allows you to join the silicone skirt to the lens frame without major interruptions of curvature continuity. The result is a mask with an extremely hydrodynamic shape and, visibility being equal, a significantly smaller size. The field of view obtained is particularly wide, laterally, and in the lower zone.

PRISMA MEW 2025

NEW REVOLUTIONARY ANTI-FOG SYSTEM SIMMETRIC OPTICAL MASK

The Prisma is much more than a mask; it is a reliable companion for exploring the underwater world in full clarity. The Prisma is equipped with the Cressi patented FOG-STOP system, which drastically reduces fogging through the internal thermoregulation of the warm, damp air exiting the nose. The external part of the skirt additionally features a cooling system made of soft heat exchangers that act as radiators. This effect drops the temperature inside the mask, bringing it closer to the external temperature, and traps the droplets of humidity before the air reaches the lenses, preventing fogging.

What makes the Prisma additionally unique is its ease of adjustment: The micro-adjustment buckle is connected to a soft connection point at the frame, making it easy and smooth to adjust the strap tension without any skirt deformation, which often causes water ingress. Thanks to the combination of two different frame materials and Cressi's innovative patented soft skirt construction, the mask folds easily to fit in your BCD or cargo pocket.

The Prisma offers the possibility to fit optical lenses for both negative and positive correction, allowing anyone to fully enjoy the wonders of the underwater world without compromising vision.

NANO & NANO CRYSTAL

85 CM3: ULTRA LOW VOLUME

This mask has a tapered structure that is derived from the popular Nano-mask patent. The IDF-Integrated Dual Frame technology system connects the silicone skirt to the lens frame without any interruptions in curvature continuity. This results in a much smaller mask with an extremely hydrodynamic shape, while still maintaining the same level of visibility. The Inclined Lens Patented Technology provides a wide field of view that extends laterally and in the lower zone. The front part of the skirt has a structural silicone insert that enhances the mask's sealing ability and creates an aesthetically pleasing chromatic effect. It is specifically designed for advanced divers, freediving, and spearfishing enthusiasts who require an extremely hydrodynamic and compact mask that facilitates diving. The Crystal silicone is a patented formula for the skirt which prevents premature discoloration and it's softer.

SQUARED FRAMELESS DIVE MASK

The SF1 is the new 2020 frameless scuba diving unisex mask. The frameless masks are loved by many divers for their low profile and ability to fold flat for easy carrying, even in a BCD pocket. The silicone face is assembled directly on the glass without mounting. This system guarantees good visibility in all directions, especially towards the sides, since it allows a maximum eye/lens approach without annoying pressure on the forehead or upper part of the nose. The low-internal volume allows for effortless clearing and quickadjust strap buckles are molded directly into the skirt for a flexible fit and reduced drag. It also represents an unbeatable value, with a cost roughly half that of similar masks.

LIBERTY

LIBERTY

OUTSTANDING FIELD OF VIEW I WITH ANTI-FOG CONFIGURATIONS AVAILABLE

It gives the diver a wide, unobstructed field of vision while snorkeling or scuba diving. It features one large lens to offer divers a phenomenal field of vision. The lens is made of tempered glass for safety. The skirt is made of hypoallergenic soft silicone, anatomically designed, to ensure a perfect seal. The mask is equipped with easy-to-use buckles for immediate length strap adjustment. The mask has an easy-to-reach, one-hand nose pocket for ear equalization, which can be utilized even when wearing thick gloves. The double-feathered edge silicone skirt works in concert with the split strap for an excellent seal on the face. The exclusive painted, coated frame brings a cool tech design style.

PENTA+

The Penta+ is the restyling of the popular Penta mask. It has 4 lenses and also introduces to this sector all the exceptional characteristics of the Matrix and the Lince. The Cressi patented system of raked lenses with an "inverted drop" shape offers incredible downward visibility, ideal for having control of the scuba diving equipment. The clear side windows are made of scratch-resistant material, more strong than glass or polycarbonate. Thanks to them, the mask offers unprecedented lateral visibility and great luminosity for total vision with no compromises. The skirt and the strap are made of hypoallergenic silicone, a very soft material compared to the low-quality PVC, that ensures a perfect seal and comfort. The buckles are embedded in the frame to offer instant adjustment of the strap length, even with one hand. It offers a very low internal volume and a record lightweight.

MATRIX

The compact twin-lens Matrix takes the basic design concepts of the Big Eyes Evolution and pushes them to a new level of performance. More pronounced inverted tear-drop shaped lenses, raked inward to sit even closer to the eyes, and a more compact build overall make the Matrix an ideal choice for divers and freedivers looking for the biggest view in the smallest package.

The mask that began a revolution remains one of the most duplicated designs today. Its inverted tear-drop lens shape and raked lenses provide 30% greater field of view than typical twin-lens masks. The high-grade silicone skirt's unique shape positions the lenses comfortably close to the eyes and provides an excellent seal.

FOCUS NEW COLOR 2025

The ultimate in versatility, this classic mask offers the best fit and performance for the greatest variety of facial shapes. Its low-volume, twin-lens design gives divers and snorkelers a proven combination of size, fit and durability. Lightweight and easy-to-clear it has swiveling, quick-adjust buckles and accepts corrective lenses. It is also an excellent value.

TECHNICAL FEATURES

- · Low internal volume allows for effortless clearing Lightweight, compact and rugged

- Ideal for travel or as a backup mask
 High-grade silicone skirt provides a leak-free seal
- · Fixed quick-adjusting buckles

SMALLER

ITACA ULTRA DRY

DRY TOP | PURGE VALVE

It has a patented dry guard at the top end that prevents water entry while using it on the surface. It has three movement joints that ensure immediate opening of the upper valve. The lower part has a smooth, flexible corrugated section that keeps the aerator away from the mouth while using any breathing apparatus. The mouthpiece is made of soft silicone and has an ergonomic angle with reduced bite-size to avoid gum fatigue. There is a lower purge valve for instant clearing, and the transparent tube has side reinforcement in colored rubber.

TECHNICAL FEATURES

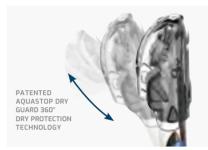

- Special patented Aquastop valve: very efficient on up/down positions
- Dry guard: seals breathing tube when submerged
 Mouthpiece: drops away when not in use-great for scuba divers
- High-quality silicone mouthpiece: is comfortable and durable

- is comfortable and durable

 Angled anatomical mouthpiece:
 reduces jaw fatigue

 Lower purge valve:
 allows water to be quickly expelled

 Streamlined design reduces drag while swimming
 Adjustable keeper for securing to any mask

WHITE/LILAC/

BLACK/YELLOW/

BLACK/SILVER/ BLACK/WHITE/ BLACK/BLACK/ CLEAR

It uses the latest dry-top snorkel technology with a compact valve that automatically closes to keep water out regardless of the angle of the snorkel. The Alpha also has a new, highly flexible tube that reduces jaw fatigue and folds compactly for storing in a BC pocket or travel pack. A new, wider elliptical shape increases air flow capacity for more comfortable breathing, while the purge valve enables instant clearing.

TECHNICAL FEATURES

MADE IN ITALY

- Dry Valve technology seals breathing tube when submerged at any angle
 Flexible tube allows folding for storage
 Mouth piece drops away when not in use: great for
- scuba divers

 Angled mouthpiece reduces jaw fatigue
- · Lower purge valve allows any water to be quickly
- Streamlined design reduces drag while swimming · Adjustable snorkel keeper for securing to any mask

SEMI-DRY TOP | PURGE VALVE

TECHNICAL FEATURES

· Profiled splash guard significantly reduces water

TAO

TAO DRY NEW COLOR 2025

DRY TOP | PURGE VALVE

TURQUOISE FLUO

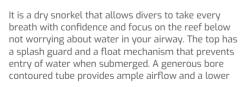

TECHNICAL FEATURES

- High-quality silicone mouthpiece is comfortable and durable

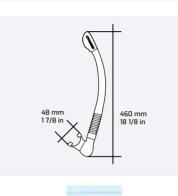

purge valve enables instant clearing when needed. The snorkel keeper allows attaching the snorkel to the mask strap, avoiding losing it on the surface or during diving. The keeper features a quick release system, just push the button to release the snorkel from the mask. Really a great idea and very simple to use.

- Dry-top valve seals breathing tube when submerged
 Flexible lower bore reduces jaw fatigue
- · Angled mouthpiece reduces jaw fatigue
- Lower purge valve allows water to be quickly expelled
 Removable adjustable snorkel keeper for securing
- to any mask

A generous bore contoured tube provides ample

airflow and a lower purge valve enables instant

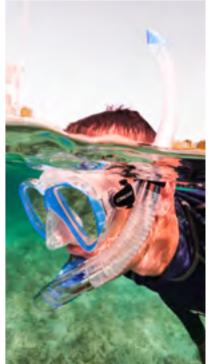

clearing when needed.

Removable adjustable snorkel keeper for securing

It is a semi-dry snorkel that allows divers to take every breath with confidence and focus on the reef below not on worrying about water in the air way. The top Splash Guard is designed to reduce water intake.

BIG EYES EVOLUTION & ALPHA ULTRA DRY

BIG EYES EVOLUTION MASK I ALPHA ULTRA DRY SNORKEL

The combo is the union of two high-level products made with quality material and great design. The product is ideal for Scuba Diving, Snorkeling, and Freediving. The mask and snorkel are made of 100% high-quality silicone, a better material and longer lasting than plastic PVC. The snorkel features a float mechanism which closes instantly to prevent water from entering the snorkel whether accidentally or purposely submerged. It has a highly flexible tube that reduces jaw fatigue and folds compactly for storing in a BC pocket or travel pack. The snorkel's wider elliptical bore shape increases air flow capacity

for more comfortable breathing and a purge valve enables instant clearing when needed. The mask is made of hypoallergenic silicone to ensure comfort and a perfect seal. Features inclined and inverted tear-drop lenses for improve downward visibility, a Cressi patented design (US 6272693). Tempered glass lenses. The easy-to-use Integrated Buckles (Cressi patented technology) are integrated with the frame with a swivel system for quickly strap length adjustment. The combo comes with a Handy Bag for protect and carry the equipment.

CLEAR/BLACK

BLACK/BLACK

BLACK/BLACK

TECHNICAL FEATURES

- Raked lenses provide excellent field-of-view
- Inverted tear-drop lenses improve downward visibility
- for managing BC-mounted gear

 Low internal volume allows for effortless clearing
- Dual-density silicone skirt flexes for a perfect seal along the face and full support around the frame
- Ribbed facial skirt provides support where needed for a soft, flexible fit
- Micrometric adjustable buckles allow precise headband adjustments
- Swiveling buckles connect to flexible, indestructible elastomer tabs for total durability and comfort.
- Accepts optical lenses.

- · Dry Valve technology seals breathing tube when submerged at any angle

 Flexible tube allows folding for storage

 Mouthpiece drops away when not in use: great for
- · Angled mouthpiece reduces jaw fatigue
- · Lower purge valve allows any water to be quickly
- Streamlined design reduces drag while swimming Adjustable snorkel keeper for securing to any mask

DRYSUIT WITH LIQUID SEAL TECHNOLOGY

Comfortable and resistant drysuit thanks to its 4 mm thick High-Density pre-compressed Neoprene and the special Liquid Seal protected stitched joints. The seams and outer neoprene lining are covered with a special layer of elastomer to simultaneously create an impermeable obstacle for the water and increase resistance at the joints. On the inside, an additional sealing strip guarantees total waterproofability. This double-sealing system has been carefully designed to meet the needs of the most discerning and seasoned divers who often require their dry suits to adapt to extreme working or weather conditions.

The special Spanflex material has also been used in the outer part to increase elasticity and abrasion resistance. The cuffs are made of smooth 3.5 mmthick neoprene on the inside to improve sealability and from Ultraspan on the outside to improve elasticity. The collar is made of the same materials but with 2.5mm-thick neoprene for more comfort and breathability when turned up. The shoulder neck and knee lines are reinforced with a special anti-abrasion X-Diamond Pad lining. Includes a practical wide leg pocket and comfortable hood.

ULTRASOFT

- One-piece wetsuit in 3 mm double-lined neoprene
 Pre-shaped legs
 YKK back zip with under zip lining
 Anti-abrasion reinforcement on the knees

This is the perfect suit for diving in tropical waters. It offers excellent protection against abrasion, while at the same time ensuring the thermal protection needed for snorkelers, free-divers, and divers. Also excellent as a protective garment for any water sport. It is made of Premium Quality Neoprene thick 3 mm to ensure warmth. The arms and legs are made of

Ultraspan Neoprene to ensure free movement and ease of donning. The chest is in Rubberized Neoprene to ensure warmth. The anatomical cuts make the wetsuit adaptable to different shapes of bodies. The knees feature protection against bumps and scratches. The back-zipper is made of the quality YKK.

K DIAMOND PAD

Diamond PAD Wetsuit Fabric Technology: This Advanced fabric technology is specifically designed for diving wetsuits, providing exceptional resistance to abrasion in high-contact areas. Built to endure the rigors of underwater environments, the material offers enhanced durability at key stress points, such as the shoulders, knees, and seat, where frequent friction and wear occur. With superior resilience against languagement and the second properties and the superior resilience against languagement. With superior resilience against long-term use in harsh conditions, this fabric ensures the wetsuit prolongs its durability and maintains its integrity.

The Bahia Flex 3mm is the successor of the Bahia front-zip full wetsuit. This model is redesigned to ensure total freedom of movement and can be used in any water sport. The wetsuit features separate anatomical cuts for both men and women. The front-zip, made of metal YKK®, ensures ease of donning and doffing. The cut is designed to guarantee complete adherence to the body, just like a second skin. The Flex areas facilitate movement, ensuring complete comfort. A small difference between

thickness makes donning and movement easier, particularly in the arms and ankle areas. Cuff seals prevent water entry while swimming and the doublelined Neoprene resists compression at depth. The double-lining is more durable than the single-lining of other competitor's wetsuit. The knee and shin area is reinforced to protect the wetsuit against accidental scratches. The Aquastop wrist and ankle seals limit water exchange.

and just the warmth needed for extended snorkeling or diving sessions in tropical waters. A long front zip makes the Skin easy to put on and the suit easily layers under thicker dive wear.

Crafted from nylon material, the Skin is a versatile and a must-have fullsuit for

traveling divers. The high-stretch material is effortless to swim in and naturally conforms to the body to reduce drag. The Skin provides UV protection on the surface

SOLO HOOD WITH BIB

NEOPRENE 2 mm

CRESSI The Solo 2mm hood features a smooth neoprene seal along the outline of the face and on the $\mathop{\hbox{\rm chin}}$ area to limit the entrance of water. It also features double lined neoprene and adds extra warmth for colder water diving. The hood's contoured shape provides a better fit and the hood's seams are glued and flat lock stitched for added comfort.

Jutland gloves are the ideal accessory for diving practitioners. With a thickness of 5 mm, they offer optimal protection against external agents and abrasions. Their ergonomic design with pre-shaped finger accommodation guarantees a comfortable and secure fit, as well as practicality and ease of use. The distinctive feature of the Jutland gloves is the ultra-grip system that extends over the entire surface area, allowing optimal grip. Reliability, functionality, style, and comfort.

Five fingered gloves 2 mm thick Neoprene, made from two different soft and light materials. The palm and finger area uses a light Gray Napa that becomes extraordinarily soft upon contact with the water. However, the upper part of the glove and the wrist area are made from very thin, supple neoprene. A large area that corresponds to the upper side of the wrist allows for instant adjustment, both before and during the dive. These are particularly suitable gloves when you need the very best touch sensitivity in the fingers. The palm also offers good resistance to abrasions.

SARAGO

THERMAL SOCKS | 7 mm - 5 mm

These socks for fins with strap or foot pocket are made of soft highly elastic nylon-lined neoprene. They prevent heat loss and keep feet warm. The smooth skin neoprene on the ankle allows maximum adherence between the sock and the leg of the wetsuit, reducing the passage of water. The sole is entirely non-slip. The construction of the blind stitch seam further improves comfort and aesthetics.

ORATA

SOFT SOLE SOCKS | 2.5 mm

These are single-lined, thin, high stretch neoprene socks. The inner is lined in Metallite so they are easy to put on.The sole has an effective non-slip lining. They can be used with both closed foot fins for greater warmth and to protect the skin from scratches and chafing, as well as with firm-soled socks, using open-heel fins. In this case, warmth is considerably increased and it is also easier to put on your wetsuit.

SEAHORSE \$

VOYAGER ROLLING BACKPACK - IDEAL FOR LIVEABOARD

- Small towel in its pocket to cover the wheels when carrying on the shoulders, so as not to soil clothes
- carrying on the shoulders, so as not to soil clothes Special pocket for carrying fins Dimensions: 81 x 57 x 33 cm · 32 x 22 1/2 x 13 in Weight: 3,85 kg · 8 lb 8 oz Volume 152 l · 40 gal

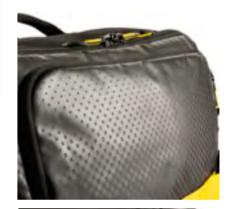

The Sea Horse wheeled backpack is ideal for those looking for practicality and durability in a single product. Constructed from 900 D/600 D polyester fabric, this bag provides excellent strength and durability, making it perfect for use in marine environments and adverse conditions. Equipped with YKK zips, it ensures a secure and reliable closure. One of the distinctive features of the Sea Horse is its ability to be rolled up for easy transport and storage. This makes it particularly useful for boat travelers, where space is often limited. The bag is also equipped with shoulder straps that, concealed in a dedicated pocket, allow it to be quickly transformed into a backpack, offering unparalleled versatility. Particular attention has been paid to cleanliness and comfort: a small wipe, housed in a special pocket, allows the wheels to be covered when the bag is carried on the shoulders, thus avoiding soiling clothes. In addition, a special pocket is designed for carrying fins, making the Sea Horse also ideal for snorkeling and diving enthusiasts. With the Sea Horse, every trip becomes a comfortable and stress-free experience, thanks to its clever design and sturdy construction.

WHEELED BAG & BACKPACK

DETACHABLE POCKET

Introducing the ultimate travel companion, the Moby durability and style for the modern traveller.

7. Made of durable 450D Ripstop fabric, this trolley
offers superior strength and longevity, just like its
renowned predecessor, the Moby 5. Front pockets, made
of water-repellent material, offer convenient options
for storing essentials. The trolley features heavy-duty
PVC-coated mesh fabric on the top and bottom sides for
exceptional durability. Equipped with heavy-duty wheels,
this equipment transport system allows for effortless
manoeuvrability. The YKK plastic zip ensures a smooth and
reliable closure. For added convenience, a detachable lower
pocket with a concealed hanging strap and thermoplastic
side loops for attaching the shoulder strap is included. The
inner, lined pocket securely holds the padded shoulder
strap. In addition, the Moby 7 has a small front pocket with
a semi-dry zip, perfect for storing valuables. As additional
equipment, a folding mesh bag with drawstring closure
is included, which can be conveniently stored in the small
front pocket. The Moby 7 is the epitome of functionality,

DETACHABLE POCKET

Large wheeled luggage ideal to carry scuba diving equipment and other water activity gear. Made of 300 and 400 Denier fabric that is light and very strong with a good looking waterproof coating. The main compartment opens on three sides allowing easy access. There are two large bellows pockets in the front with zip closures, two side pockets for fins and a small upper pocket that holds an address tag. There are also two adjustable, padded, straps for carrying on the back that can be placed in special pockets when the backpack is being wheeled. The reinforced pull handle is telescopic and fully retractable. The wheels have a large diameter and can be removed and easily replaced in the event of breakage. There are two carrying handles: a reinforced one at the top and one with Velcro closure at the bottom. The back of the bag houses supporting rods to keep the bag in a vertical position. All the zips are very strong YKK.

PIPER ULTRALIGHT TROLLEY | 2.9 KG

IDEAL FOR

- 2-stage telescoping handle
- 2 exterior compression straps with quick-release buckles
- Top pocket with zipperCentral lock point zipper
- for pickpocket protection
- Heavy-duty wheel housing and bumper protection
 Grab handles on top, side and bottom for easy
- Interior compression straps and side pocket for
- organization
 Internal mesh compartment with zipper
 Robust wheels for multi-terrain maneuverability

- Back ID pocket
 Scratch-resistant Denier fabric
- Front-zip for easy donning and doffing

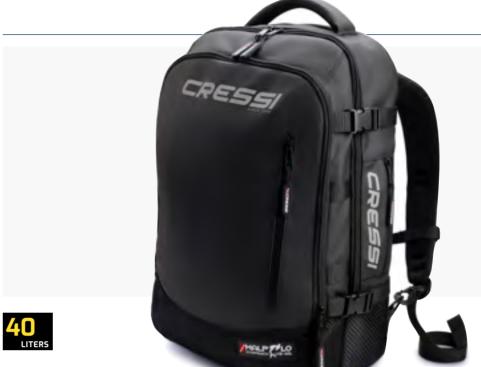

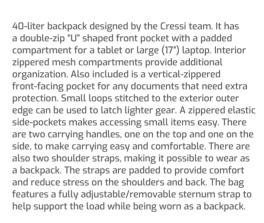

The Piper is a suitcase designed and especially convenient for air travel, with a special 2 stage telescoping handle and 2 exterior compression straps with quick-release buckles. Several zippers, heavy-duty wheel housing, bumper protection, and scratch resistant denier fabric ensure that your equipment will be able to be stored safely. Grab handles on the top, side, and bottom of the suitcase make this very easy to hold.

The interior of the Piper features compression straps and a side pocket to help organize your belongings. A back ID pocket makes it possible to label your suitcase. At 2.9 kg | 6.4 lb and 4.9 liters | 1.73 cubic feet of capacity, the Piper is light and great for traveling. Its dimensions are compliance with the carry-on airplane regulations: 35.5 x 23 x 56 cm | 14 x 9 x 22 in.

MADE IN ITALY

Torch with a highly asymmetric design boasts excellent ergonomics and a highly tactile perception of its geometric characteristics. Thanks to this particular design, the switch position is immediately found without needing to use your eyesight. The porthole and body are coated with thermoplastic rubber to extend shelf life and reduce noises from impact when used for fishing. These ergonomic features are a big advantage over aluminium torches with a circular section which do not give feedback on the position of the grip and,

The switch has three positions: Off, On Unstable with Automatic Return, On. The "On Unstable" position is particularly useful in fishing because it allows flashing by one simple press. The strap with slider spring allows adjustment according to the user's needs, but being elastic can be pulled out in case of emergency. Power is supplied by four AA batteries, either alkaline or rechargeable. The electronics ensure a constant level of brightness even when the batteries are rechargeable and/or not fully charged. Batteries

NEW WHITE COLOR TEMPERATURE

The LED has a white color temperature similar to sunlight for maximum return of the colors in the underwater environment. The light beam of the LED is narrowed into a spot light beam of about 6° by means of a lens made of ultra-transparent material protected by the polycarbonate optical porthole.

ACTIVE ELECTRONICS

Power is supplied by four AA batteries, either alkaline or rechargeable. The power supply has an electronic management system that eliminates the gap between the different electrical potentials of different types of batteries and ensures an efficiency of 30% higherthan the commonly used systems. The active electronics of the flashlight guarantee constant light, even when the battery charge decreases. When the charge drops below the safety threshold value, the lighting level will reduce to warn the user that the batteries are depleted.

ASTRA 2100 1555

SCUBA DIVING LIGHT

Astra 2100 is the underwater torch that transforms every dive into an extraordinary visual experience. Equipped with an advanced CREE XHP50 LED, this torch not only illuminates the dark depths with 2000 lumens of power, but also enhances underwater colors, making every detail bright and vivid like never before. Ideal for underwater explorers, Astra allows you to discover the mysteries of the marine world in all their vibrant beauty.

With three lighting modes—100%, 50%, and strobe—suitable for every need, Astra ensures light duration from 4 to 7 hours, allowing for long underwater explorations. The heart of Astra beats thanks to a rechargeable 5000mAh lithium battery, which fully charges in just 3 hours through an innovative magnetic connector. This charging system is designed to withstand sand, salt, and other external agents, ensuring reliability and functionality under any condition.

Made from sturdy and lightweight aluminum alloy, with a reduced weight of 438 grams, Astra is as durable as it is manageable. Its IPX8 certified waterproof up to 100 meters and impact resistance from 1 meter make it the perfect ally for every dive.

ASTRA 1200 MINISTRA

SCUBA DIVING LIGHT

Astra 1200 is a compact and lightweight diving torch that delivers an exceptional visual experience during dives. Equipped with a CREE XPL2 LED, this torch illuminates the underwater world with 1200 lumens, enhancing color perception and making every detail sharp and vivid. It's ideal for marine exploration enthusiasts who want a handy yet powerful torch.

It offers three lighting modes—100%, 50%, and strobe—that adapt to various underwater conditions, with battery life ranging from 3 to 5 hours depending on the mode used, thus allowing for extended dives. The Astra 1200 recharges in 4 hours via a magnetic connector that resists external agents such as sand and salt.

Constructed from aluminum alloy, it weighs only 240 grams, making it extremely lightweight and easy to handle. Certified IPX8, it can be submerged up to 100 meters and withstands impacts from 1 meter, ensuring reliability and durability.

NEW 2025

SPEARFISHING LIGHT

The Hunt torch, specifically developed for spearfishing, combines power and functionality in an ergonomically advanced design. Equipped with a Luminus SST40 LED, it emits a brightness of 1600 lumens and a light beam that reaches over 290 meters (in the air), perfect for environments with limited visibility.

The ergonomic design is enhanced by a curved profile that ensures a comfortable and secure grip, further improved by an integrated grip and anti-slip button, ideal for intuitive use even with diving gloves. This allows the diver to activate the light only when necessary, thereby maximizing battery life and minimizing the risk of startling fish. The torch is made from high-quality materials that not only provide robustness and impact resistance up to 1.5 meters but also ensure waterproofness up to 100 meters deep (IPX8). It features a huilt-in 5000 mah battery, rech charging so salt, or dust of maintena it an essenti

CHAKU

Blade length 9.1 cms - 3.5 in
Total length 21 cms - 8.25 in
Folded length 12 cm - 4.7 in
Ultra high hardness

The Chaku Folding Knife is available in titanium or stainless steel. The titanium version is rust resistant, non-magnetic and requires minimal maintenance. When folded, the knife is only 4.7" (12 cm) and it can easily be stored in your pocket or be securely clipped to your BCD or harness with its slide locking lanyard. The overall length is 8.25" (21 cm) and the 3.5" (9.1 cm) blade has a line cutter with a spring-loaded safety lock, a partially serrated edge, and a sharp drop point tip. The Chaku handle is textured for a positive grip.

SKORPION

Skorpion is a modern knife of last generation design and of medium dimensions, with a resistant tempered blade of tempered AISI 304 steel, with a smooth edge and a serrated edge with a wire cutter incorporated. The handle is anatomically shaped and made of "soft grip" material for a secure grip. It is separated from the blade by an integrated handguard made of technopolymer. Includes a pot in the same material as the leaf. The cover is made of black technopolymer and has straps for fixing to the thigh or belt. The knife comes with a sheath that features a locking mechanism to allow one-hand release. The sheath comes with two, standard issue straps to attach it to your leg.

ALLIGATOR 2 IN 1: KNIFE/SCISSORS Knife-scissors very practical for all

Knife-scissors very practical for all types of operations underwater. Made of high-strength stainless steel, it is helpful as scissors, as a knife with a smooth edge blade, or as a saw blade, and also has a valuable recess as a wire cutter. Includes serration for use as pliers. Compared to other similar knives, it has the advantage of its contained size and its full use and ergonomics without having to open it to cut efficiently using it as a knife. Excellent cutting capacity and oxidation resistance.

TECHNICAL FEATURES

- · Extremely thin and light blade in compound made of elastomerized technopolymers developed by Cressi • Stringer consisting of technopolymers with
- elastomeric loads with high flexural modulus
- · Footpocket / blade angle of 29 degrees Modular detachable fin
- Superior performance
- Superior comfort · Self adjusting foot pocket

GARA TURBO FOOT POCKET

INCLUDED GARA MODULAR INSOLE

- The new insole for Gara Modular fins is recommended for use with thin boots in temperate waters, because it improves the kick performance. The semi-rigid material of the insole is completely recycled. The insoles are supplied as a pair (right and left foot) and can be cut into their shape in three different sizes, according to pre-printed guidelines.

 Down-size Gara Fins foot pocket preformed sole

5 cm IMPULSE LONGER BLADE

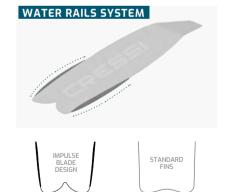

parameters for S-shaped undulating deformation to this innovative fin. This particular movement permits a notable accumulation of elastic potential energy in the blade, which is released in the return kick, transforming into thrust.

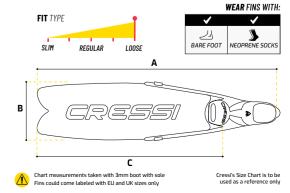

BLACK

The thermoplastic rubber used for the water channelling rails is extremely flexible and soft so as not to undermine the intrinsic characteristics of the blade.

GARA MODULAR TURBO BOOST

AGILITY & PERFORMANCE

TECHNICAL FEATURES

- •Extremely thin and light blade in compound made of elastomerized technopolymers developed by Cressi
- Stringer consisting of technopolymers with elastomeric loads with high flexural modulus
- Footpocket / blade angle of 29 degrees
 Modular detachable fin
- Superior performance
 Superior comfort
- Self adjusting foot pocket
 Powerful thrust return
- · Flexible thermoplastic rubber Exceptional lightness

Guaranteed superior performance

GARA TURBO

The Gara Turbo Boost fin, an evolution of the Impulse design, exploits a revolutionary S-shaped wave deformation technology. This movement allows considerable elastic potential energy to be stored in the blade, which is released in the return of thrust. This fin is incredibly light, reducing fatigue without compromising performance.

FINS
WEARABILITY:

GARA MODULAR BLADES

GARA MODULAR CARBON BLADES

The XLD blade is softer than the MD version, offering greater flexibility and a more forgiving kick stroke. This makes the XLD ideal for divers who prefer a smoother, less strenuous kicking motion, whereas the MD version is stiffer and provides more power per kick, better suited for stronger swimmers or those needing greater thrust.

GARA 3000 LD

LONG DISTANCE

The Gara 3000 LD is Cressi's entry-level long blade fin designed with softer blades, which makes the Gara 3000 a perfect choice for the beginning diver or those unexperienced with long-fin blades. The Gara 3000 is constructed with durability in mind and long soft plastic blades that can effectively transfer power with minimum effort. This makes the fin comfortable and easy on the legs for beginners as well as during long duration dives.

The Gara 3000 is an extremely comfortable and is a full footpocket style fin. This fin is also constructed using Cressi's unique three material molding process, where different compounds are bonded together to provide flexibility in the foot area, while being able to deliver power through the blade due to the stiffness the process provides. Can comfortably be worn with or without neoprene socks.

SIZE CONVERSION CHART

GARA 2000 HF

HIGH FREQUENCY

Gara 2000 HF is an icon in the diving industry, and is the first fin in the industry to be manufactured using a three material molding process. Due to its lightweight and durability, it is an excellent choice for those looking for a fin that can provide the ultimate in performance while deep freediving and spearfishing, and those looking for obtaining maximum depths. The GARA 2000 has the stiffest blade in the CRESSI line and is an extremely comfortable full footpocket style fin, with long firm blades with built in stringers and runners to effectively direct water flow down the blade aiding in efficiency. This fin is constructed using multiple compounds bonded together to provide comfort and suppleness in the foot area and strength and rigidity in the heel and blade area. Can comfortably be worn with or without neoprene socks.

- Stiff Long Blade designed for maximum depths Full footpocket for comfort
- · Long blade for efficiency

GARA PROFESSIONAL

LONG DISTANCE

The Gara Professional LD is a high performance fin, requiring minimum effort to load the long blades. They are more forgiving than other long blade fins for untrained legs, making this an excellent choice for deep free divers and spearfishers of all levels. They are ideal for long distance swimming, while ultimately providing the power and efficiency needed for deep free-diving and spearfishing. Due to the multi compound bonding process used during the manufacturing process, the Gara Pro LD is an exceptionally soft full footpocket style fin, which provides comfort during prolonged use on those long days in the water. Gara Pro LD delivers maximum power with minimum energy through its long firm blade that runs over the footpocket. Can comfortably be worn with or without neoprene socks.

TECHNICAL FEATURES

- · Firm blade designed to run over the footpocket
- for ease of use Full footpocket for comfort
- Thermo-Rubber soles for extra grip on wet surfaces Stiff long blade designed for maximum depths
- Full footpocket for comfort

The simple things in life often turn out to be the most useful and Fin Keepers are a perfect example. Their benefit is great especially if your foot pocket fits a little loose. They are a simple, inexpensive concept that works great, they last for years, yet rarely mentioned. Fin keepers keep the foot pocket tight against the heel giving the diver full fin power. You can't truly appreciate them until you use them. When you do, you will notice the difference in power instantly. By holding the foot pocket against the bottom of the heel they limit or delete lost power. Without fin keepers every time you kick the fin the foot pocket will lift off your heel. Just a 1/4" of movement away from the heel will result in major power loss. Power is lost but spent energy is unchanged.

GARA PROFESSIONAL LD FINS + METIS MASK + CORSICA SNORKEL

Cressi made this set composed by professional items, of high quality and performance, to give the opportunity to use a high standard equipment for freediving and for spearfishing.

ATOM

ULTRA LOW VOLUME MASK

Atom is a radical mask, with incredible low internal volume, thought and built for freediving. It is a frameless mask. Construction material has been reduced to the minimum. Inside the silicone facial a stiff core is costamped with the two lenses, giving just the right rigidity to the mask. This semi-rigid core substitutes the usual external plastic frame and allowed us to reduce the internal volume of the mask in an unseen way until today.

BLUE METAL

Another feature of Atom is the ergonomic shape of the nose. Two small cavities, carved by the nostrils, facilitate the action of compensation. This makes the mask extremely stable during the dive. Atom will not move when you compensate pushing.

Atom is the perfect mask for the expert free-diver and spear-fisher, who wants the maximum performance from its gear.

DOUBLE INJECTION SILICONE STRAP

Cressi's next generation diving masks are all equipped with the Integrated Dual Frame Technology which offers exceptional field of view, and the new Calibro is no exception. The mask is designed so that the integrated face and frame allow for an extremely hydrodynamic and compact shape and a particularly wide lens, maintaining the mask extremely close to the face. Cressi's Calibro combines minimal internal volume with a phenomenal field of view due to the raked angle of the frame.

The buckles are, as always, directly integrated into the rigid skirt through a solid but flexible rubber attachment that allows you to adjust and place the mouthpiece without shifting the mask. Thanks to its matte coating the mask's components all match, enhancing the underwater experience since it prevents reflections in the water that may disturb marine life. Calibro is the perfect mask for freediving since it is designed to provide the diver with a feeling

of total freedom and comfort. WHITE/PINK GREEN BLUE METAL BLACK

NANO

The Nano is for advanced divers, freediving and spearfishing lovers, designed to offer an extremely hydrodynamic and compact shape to help divers cut through the water and aid movements in small spaces. To develop the Nano mask, Cressi invented and patented the Integrated Dual Frame Technology System that joins the silicone skirt to the rigid frame lens without interruptions to guarantee a perfect seal and drastically reduce the internal volume. It does not require intentional equalizing. The swiveling buckles feature micrometric regulation. The mask features inverted teardrop lenses slightly inclined made in tempered glass. An anatomical strap ensures a perfect seal on the head. Available with mirrored lenses to hide your eyes while

It is a mask specifically designed for spearfishing, but it's also suitable for scuba diving. It has two windows and a high-quality silicone skirt that is more comfortable and longer-lasting than traditional PVC plastic. The silicone skirt is adaptable to different face shapes and ensures a perfect seal. The strap is also made of silicone, large and wide behind the neck to provide a tight and comfortable fit. The length of the strap is adjustable with easy-to-use buckles. You have the option to choose different lenses, such as colored or mirrored, to enhance your underwater view. All lenses are made of tempered glass, ensuring they are shatterproof and scratch-resistant. The nose pocket is soft and easy to access, allowing for proper equalization using only two fingers, even when wearing gloves.

This mask was designed specifically for deep sea diving, with innovative features that place it at the top of its category. The special reduced skirt, complete with a small seal ring, sticks like a suction cup to the face, leaving minimum air space inside the mask, which make compensation extremely easy, taking very little air from the lungs.

PACIFICO

The lens-eye distance is the absolute smallest on the market and guarantees, even with small diameter lenses, excellent visibility in all directions. The two optic glass lenses are thicker than the standard to allow a special safety mould. The strap comes with instantly adjusting buckles for an easy and precise fit.

TWO-PIECE WETSUIT

Inspired by the livery of the pelagic fish. A special digital printing system has been used for this new camouflage wetsuit, allowing high resolution images to be obtained and thus create an exclusive camouflage design. The new "Cryptic Camouflage Technology" of Cressi is based on a real image of

a fish (a dolphin fish in this case, with its dominant colours), to create camouflage that is very close to the original and then altered to obtain a repetitive effect that is one of a kind. The materials used are: high elastic camo on the outside, open-cell neoprene

TOKUGAWA

2-PIECE WITH HOOD

The Tokugawa wetsuit is an excellent spearfishing and freediving wetsuit. It was designed by the Cressi Australia team, with the knowledge and help of the Italian Cressi family, based on the market-leading Apnea wetsuit pattern. It was designed specifically for use in blue waters as a perfect hardwearing spearfishing and pool training suit. The unique camouflage adapts to different water environments - from the blue waters of the Caribbean Sea to the greener tones of the Northern USA. It is manufactured with flexible, comfortable, soft neoprene. This material is designed for flexibility. This wetsuit is named in honor of the Tokugawa shogunate — The Tokugawa shogunate was the last feudal Japanese military government, which existed between 1600 and 1868.

BELTS

SERPENT NEW 2025 SILICONE MARSEILLAISE WEIGHT BELT

Crafted from 100% High Grade, tear-resistant Silicone, the Serpent belt boasts a 200kg tensile strength, ensuring durability in tough underwater conditions. With higher stretch and flexibility than rubber, it provides a more comfortable fit. Its UV, saltwater, heat, and chemical resistance extends its lifespan, outperforming rubber alternatives. The belt is softer and less abrasive on diving suits, featuring a heavyduty stainless steel quick-release Marsellaise buckle with a roller for secure and easy adjustments. With 9 holes spaced 4cm apart, it accommodates all diver sizes. Measuring 4.5cm wide and 4.5mm thick, it's perfect for diving, freediving, and spearfishing.

TUNA DRY REED

WHEELED BAG - FITS LONG BLADE FINS

TECHNICAL FEATURES Waterproof bag Made of Polyester External pocket Side handles and shoulder straps

- · Roller skate wheels

INSIDE STRAPS

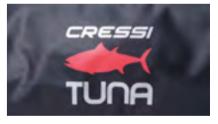

It is an ideal bag for transporting any kind of equipment for water activities keeping protected from water. It has a capacity of 120 liters | 4.23 cu ft that can fit also long freediving fins. Made of highly resistant materials, it allows you to keep your equipment dry and protect electronic devices. Equipped with central handles/shoulder straps and side handles to facilitate transport even with the presence of wheels. The presence of wheels facilitates transport even on long routes. Equipped with practical central handles/shoulder straps and reinforced side handles. A practical waterproof side pocket keeps small items dry and protects electronic devices. Internal straps with clip closure allow you to secure the sports equipment during transport. Made of very resistant materials, with well-finished stitching. The lower part is reinforced, shockproof, and insulating. Waterproof seal. Keep your equipment dry, and protect electronic devices and documents from water, dust, and sand.

GORILLA PRO

One large and roomy bag. The bag is long enough to hold even the long freediving fins. It is made from a strong radio frequency (RF) welded seam PVC and is waterproof. Equipment can be washed with water while still inside the bag. Once you have finished washing your gear, the bag has a special draining cap situated at one end to let water out easily and conveniently. Comes with handy top grab carry handles and two straps that can also be used as shoulder straps. No water comes out when transported, even by car.

CRESSI

CHEROKEE POWER

Anticorodal black frame with integrated spear guide, grip made of engineering plastic reinforced with glass fibre, interchangeable high or low soft sternal support. Ultra-light triggering case with trigger, release mechanism and line ring on the side in AISI 316, machined from solid with a CNC process. The shock absorber makes silent the release of the shaft. Reversible side-safety mechanism. Reinforced reel with steel pin buckle.

Head for double elastic with magnetic spear lock: as soon as the spear is put in place, it is held by two magnets mounted in a watertight chamber. This characteristic guarantees maximum speed of reset without the disadvantages of conventional mechanical restraint systems. The speargun is supplied with double 16 mm natural latex band, with Dyneema wishbone.

CRESSI SPEARFISHING

2024 COLLECTION

With this catalogue, we would like to highlight our origins,

which have distinguished us over the years. Today, with

the same passion as then, we follow the needs of our

customers, from the beginners to the most ambitious

athletes, sure of providing products suitable for all needs,

always focusing on technology and results. In these 76 years the company has always preserved its DNA, which is well represented by Cressis logo. The "C" logo with the mermaid, in the origin with the speargun, is recognisable all over the world as a prestigious brand of watersports and spearfishing.

Our goal is to provide a complete vision of our products Dedicated to all those who make spearfishing their

passion. The work undertaken over the years carries

out a constant renewal of products with strict testing and always new technologies, placing us at the top for reliability, performance and durability. All this takes in thanks to a continuous dialogue between our designers, who are always ready to make the best improvements, and our ambassadors, expert testers who have made the sea their home.

NOW RIGGED
Ready to Shoot

120 cm 110 cm 100 cm 90 cm

The Cressi Victory fishing rifle is the ideal choice for fishing enthusiasts looking for a superior experience. With its excellent rebound control and great shooting accuracy, the Victory guarantees more effective and rewarding fishing.

What makes the Victory rifle different from others is its 31 mm round body; despite its rigidity, it offers exceptional hydrodynamics in all directions. This allows smooth and fast movements in the water,

enabling the angler to move nimbly and easily to reach the best position and hit the target with precision.

The result is a durable speargun that delivers exceptional performance, allowing the angler to meet challenges in the water with ease and precision. In summary, the Cressi Victory bungee speargun is a high-quality option for those wishing to enhance their fishing experience.

WHERE IS THE INNOVATION?

The shaft that is retained on the arbalete thanks to a Neodymium magnet on the head and the construction technique that allows for excellent balancing in the water.

WHY

MADE IN ITALY

The Victory will guarantee a better fishing experience thanks to its excellent recoil control and great shooting accuracy.

WHAT MAKES IT DIFFERENT?

FOR BIG GAME SPEARFISHING «

The circular 31mm shaft is very rigid but provides excellent hydrodynamics in all directions, allowing smooth and fast movements in the water.

SPECIAL ANGLED HANDLE TO INCREASE SHOOTING

The Comanche Rail is the latest version of Cressi's world champion spear gun. The high-strength, anti-corrosion aluminum barrel now features an integrated guide rail for increased accuracy. The hightech and lightweight modern thermoplastic hand grip and muzzle guarantee the utmost maneuverability in the water, adding to the Comanche Rail's accuracy. The compact and hydrodynamic muzzle makes it possible to add a second lower band to increase power for larger prey. The muzzle and handgrip are

configured so the shooter can easily acquire a sight picture of the gun while simultaneously tracking their target. The Comanche Rail comes with a heat-treated 6.0 mm spring stainless steel 17-4 PH notched shaft, 16 mm parallel power bands, metal articulated wishbone, and a shaft rigged to the gun with a 1.4 mm braided multifilament line rated to 80 kg | 176 lb. The Comanche Rail also features a dovetail notch in front of the trigger guard, allowing a reel to be mounted.

Apache is Cressi's entry level speargun and can also be handily used as a second gun. This gun is an excellent choice when fishing in holes, around rocks, shallows and where the target is in close proximity. The Apache incorporates a closed muzzle, which helps with ease of loading and improved accuracy. The sealed barrel is anodized for enhanced corrosion

resistance, while the ergonomic molded handle permits easier maneuverability and quick muzzle

The power band is fitted with a standard stainless wishbone and the gun includes the widely preferred Tahitian style flopper shaft.

REELS R20 - R30 - R50 **DOVETAIL MOUNTING SYSTEM**

The frame and the central pin are in AISI 316 steel. The drilling on the frame itself allows it to be used also on arbalete spearguns of different brands. The special clutch provides an excellent closing torque. The assembly system allows easy maintenance and cleaning. All sizes are equipped with a rewinder ring and size R50 is also equipped with an anti-blocking roller. The models R30 and R50 are equipped with a lightened drum in order to weigh as little as possible on the balance of the speargun.

TECHNICAL FEATURES

- $\cdot \text{Reel of sturdy construction that combines the resistant Delrin material with assembly} \\$ elements in AISI316 stainless steel
- · Constructed from a single piece of Delrin which is worked by a high precision lathe
- Dovetail mounting for quick assembly, compatible with many Cressi rifle models

MULTIFILAMENT + CRIMPS

Make the shooting line for your speargun using this rigging kit. The kit is composed of a strong multifilament and a set of crimps. Choose between different thicknesses, lengths, and colors and make your own using the Cressi Crimping Tool (sold separately). Thanks to this kit it is possible to secure the shaft to the speargun, and when the spear is s fired, the shooting line trails behind it, allowing the diver to maintain control over the spear and the fish it

may have speared. The line is engineered to last over time and withstand great tension, ensuring that doesn't break when a fish is speared or during retrieval. The 1.6 mm diameter can resist up to 90 kg · 200 pounds of tension. The 1.8 mm diameter can resist up to 136 kg · 300 pounds of tension. The 2.0 mm diameter can resist up to 181 kg \cdot 400 pounds of tension. The 7.62 m \cdot 25 ft version comes with 8 crimps, while the 15.24 m · 50 ft with 15 crimps.

PRECISION & VERSATILITY

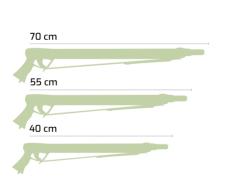

MACH

Cressi's Mach pneumatic speargun is a product that stands out for its exceptional performance and versatility. The excellent ratio between size and power makes it ideal for both beginner and experienced fishermen. The offset shaft allows for easy and precise pointing, enhancing the fishing experience; furthermore, the muzzle with large outlets is designed in such a way as to avoid energy dispersion when the shaft is released, guaranteeing greater power and shooting precision.

Another innovation is the side rod release. This system simplifies reel operation and loading, allowing the angler to easily handle the rifle. The steel trigger offers great sensitivity in shooting, allowing the action to be precisely controlled.

The SL Star range of pneumatic spear guns has been in production for many years now, and they have won worldwide fame for their excellence in terms of robustness, reliability, precision and powerful shooting. The various models correspond to the equivalent models in the SL series, without power reducer. Constantly updated over the years, the SL Star spear guns are ultra light, easy to use, and fire quickly. They come with anatomical high grip butts enabling the gun to be held in line with the arm with no extra effort. The bright red butt means you can identify the gun even if it ends up on the sea-bottom after shooting.

A new pole spear combining two different materials for increased control and precision while catching the fish. The bottom section is made in aluminum, measuring 38 3/16 in (97 cm) in length, and the upper section is made in fiberglass, and is 33 7/8 in (86 cm) long. The aluminum section diameter is 5/8 in (16 mm) and the fiberglass is 1/2 in (13 mm). Due to the lightness of the fiberglass, it is effortless to move the pole spear in the water, allowing swift movement. The aluminum handle guarantees a firm grip and stability. The end is rounded with a hole for a rubber sling. The pieces are screwed together using a resistant thread. Both the male and female fitting features two spanner flats that allows tightening using a wrench. The fiberglass top ends with a male

fitting of 6 mm to be joined with a spear tip. The fiberglass section is coated with a non-slip hand grip long 30 11/16 in (78 cm). The rubber sling is made with Ø 10 mm OD latex tube with cord inside, fixed to the hole. The latex tube length is 35.8 in (91 cm), cord length is 8.3 in (21 cm): total length of 44.1 in (112 cm). The pole spear comes with a 3 barbed prong paralyzer tip (11 3/8 in | 29 cm). A tip protection cap is included. The total length of the pole without tip is 6ft (183 cm). The Hybrid Pole Spear is designed and developed by Cressi and made in Taiwan. Cressi has been an Italian brand pioneer in spearfishing, freediving and scuba diving equipment. The product is covered by a 2-year limited warranty.

Red for excellent visibility, it uses two casings: an outer skin made of abrasion-resistant material ensures excellent protection for the two inner inflatable chambers, which are white. A mesh cover makes the bottom abrasion-proof and ensures effective drainage so that the buoy retains its lightweight at all times. The upper part is fitted with multipurpose pockets and a big expanding container. A mesh bag made of adjustable elastic straps will carry additional objects. A zipper along the center gives access to the two air tubes, which are kept separate for fail-safe buoyancy. A casing for the pole of the flag required by regulations is prouded in the center of the front section of the float. Also red, the line is about 20 m long and is fitted with two plastic snap books. This buoy comes with a convenient whistle are additional safety device. hooks. This buoy comes with a convenient whistle: an additional safety device.

The Cressi Torpedo Pro float is constructed with 210-denier nylon TPU fabric in a hi-visibility orange. It features a reflective strip mounted laterally across the float. The float's tapered front, or Torpedo shape, helps reduce drag, so it moves through the water more efficiently. The Flag that comes with the float is regulation size measuring 30.5 x 30.5 cm | 12 x 12 in with a 7.6 cm | 3 in diagonal white stripe and a stiffener. There is one stainless steel D-ring on the front of the float as the main attachment point, and 4 plastic auxiliary D-rings located around the float. There is an oral inflator to fill the float. Underneath the float, there is a weight pouch to help stabilize the float and keep it upright while on the surface. Once inflated the dimensions of the float are $99 \times 23 \times 20$ cm $\cdot 39 \times 9 \times 8$ in.

PALAU SET

ONDA MASK + SUPERNOVA DRY SNORKEL + PALAU FINS

The Palau are open-heel adjustable fins designed for barefoot use, offering exceptional comfort and adaptability. Ideal for various water activities, these fins provide a secure fit and easy adjustability, making them perfect for snorkelers, swimmers, and casual divers seeking a flexible, high-comfort fin.

The Onda has a single tempered glass lens, and is designed for snorkeling, swimming and scuba diving.

The Supernova Dry has a splash guard on the top that reduces the entrance of water during use on the surface. The top features a special valve that seals the tube when diving, even when the snorkel is submerged. A water collector, featuring a purge valve, allows quick and easy expulsion of water.

The Palau set includes a re-usable zip-up bag with a shoulder strap, perfect for travel and recreational use.

FRAMELESS COLORAMA DIVE MASK

The F1 masks are loved by many divers for their low-profile and ability to fold flat for easy carrying, even in a BC pocket. Cressi's frameless design bonds a high-grade silicone skirt directly to a single lens for the ultimate in simplicity. The low-internal volume allows for effortless clearing and quick-adjust strap buckles are molded directly into the skirt for a flexible fit and reduced drag. It also represents an unbeatable value, with a cost roughly half that of similar masks.

TECHNICAL FEATURES

- Ultra low-volume, single lens design for excellent field-of-view
 Silicone skirt bonds directly to the lens for lower weight and reduced drag
 Fast-adjust ratcheting strap buckles mounted to skirt
 Supple, high-grade silicone seals gently and securely against the face
 Tempered glass lenses
 Easy-access nose pocket for equalization
 Excellent value

The Marea is made in 100% silicone to ensure comfort and a perfect seal. It is a multi-use mask suitable both for use on the surface and in depth thanks to the small inner volume and to the soft nose pocket to compensate for air pressure. A mask particularly suitable for freediving and snorkeling, but just as appropriate for use in scuba diving. It has separate lenses, a skirt edge that adapts to most faces and a small inner volume, perfect for freedivers. It is made from soft silicone and comes with strong rapid action buckles to adjust the strap.

INNOVATIVE CLOSED-CELL FOAM SEALING SYSTEM

TECHNICAL FEATURES

- Revolutionary technology: Constant air flow, hermetic closure
 Smooth breathing
 Optimized performance: Excels in underwater
- Suitable for any underwater activity
 Large water outlet valve

By introducing the Seal Dry snorkel, Cressi has redefined the concept of comfort and performance. This innovative snorkel features a revolutionary new patented system that stands out from other dry snorkels available on the market. It has been designed by eliminating the reduction of the tube section: this allows you to breathe as if there were no dry system, guaranteeing a fluid and natural flow of air, without compromising user comfort. Another feature of the Seal Dry is its new closed-cell foam system, an intelligent and effective replacement for the traditional float. During immersion, this system creates an airtight seal that prevents water from seeping into the tube, instead maintaining a

constant and facilitated flow of air during immediate emersion. The advanced design makes the Seal Dry ideal for a wide range of diving activities, but it is particularly suitable for freediving and snorkeling. Despite its sophisticated technology, Seal Dry remains versatile and ready for any situation; it has a large valve for rapid water discharge, ensuring effective cleaning and optimal management of conditions in the water. Cressi's Seal Dry represents the pinnacle of innovation in dry devices for snorkeling and freediving. It offers an unparalleled breathing experience, allowing enthusiasts to dive the seas with confidence and comfort.

LONG ADJUSTABLE FINS

TECHNICAL FEATURES

- Open heel foot pocket designed for bare feet
 Soft elastomer material delivers outstanding comfort
 Ideal for sharing among family and friends or for rental departments
 Easy-kicking blade responds well to any kicking style
 Blade extends from the top of the foot pocket for maximum surface area

BLACK/YELLOW BLACK/PINK

These open-heel fins are made for use with bare feet and provide outstanding comfort and versatility. The openheel design means each fin can accommodate a wider range of sizes, so family members or friends can share the equipment. This allows dive schools or rental departments to stock fewer sizes while providing very high-quality fins to customers. The Palau's blade delivers excellent thrust with a modest kicking effort.

PALAU SAF

SHORT ADJUSTABLE FINS

The Palau short adjustable fin (SAF) opens the way for a new type of snorkeling and swimming fin. It has been designed for two specific purposes. The first was to have a foot pocket that could easily adapt to at least three or four consecutive foot sizes. This would enable the same fin to be used by all the members of a family, or by a

group of friends. It would also make it great for rentals in a diving center or on a charter boat, without requiring an infinite number of sizes. The second purpose was to guarantee extreme comfort and an ease of fit in a strapped open heel fin even if it is to be worn barefoot.

TECHNICAL FEATURES

- Short blade and open heel foot pocket Designed for bare feet
- · Soft elastomer material delivers outstanding comfort · Ideal for sharing among family and friends
- · Easy-kicking blade responds well to any kicking style

FULL FOOT POCKET FINS

TECHNICAL FEATURES

- · Patented Cressi molding technology used to create lightweight, responsive blade
- · Computer designed foot pocket with stiff base better transmits power down the blade
- · Soft thermo-rubber foot pocket material is
- comfortable for extended wear Lightweight polypropylene blade
- · Blade ribs provide precise flex control for maximum

the best technologies used in freediving and scuba diving. Cressi's

unique molding process also allows for the use of three separate

can power through currents and enjoy hours on the water without

undue muscle strain. The Pluma's computer-designed foot pocket

provides excellent power transmission and unparalleled comfort.

FINS Wearability:

Cressi's Size Chart is to be used as a reference only

Agua is a very easy fin to use, and doesn't require any special athletic or water-sport abilities, yet it still delivers excellent performance without tiring your feet. Thanks to the latest technology and Cressi's experience in developing these products, we've been able to markedly decrease the weight of this

fin compared to others in its category, while still preserving excellent responsiveness. The foot pocket features the original Self Adjusting Foot Pocket system, which thanks to the special softness and elasticity of the blends makes for a consistently soft

RONDINELLA

FULL FOOT POCKET FINS

TECHNICAL FEATURES

- Full foot long blade
 Above blade foot pocket
 Reactive polypropylene blade
 Flexible and comfortable foot pocket
- · Light and powerful

The Rondinella is the ideal fin for snorkeling and swimming. Made with the same materials as the more technical range: polypropylene for the skin and very flexible thermoplastic rubber for footwear and side members. Polypropylene is the main elastic of the blade which translates into a fluid and effective finning with reduced effort.

The fin is designed with the shoe in the middle of the blade so that the transmission of force is effective, with a progressive and pleasant movement for the

swimmer, reducing the hydrodynamic resistance of the upper part of the foot.

The sole of the shoe has a calculated rigidity to avoid foot cramps. The back area of the foot pocket is larger and reinforced, and a small rubber tab on the upper part makes it easier to put it on.

Its proportioned design, the materials, and the comfort of its structure are an excellent quality / price / comfort ratio of the fins of this category.

Blade made of EVA

YELLOW

FULL FOOT POCKET FINS

Colorful and functional, the Clio has been a staple of the Cressi fins line for many years. The blade, made with EVA, is melted during the molding with a Soft Thermo-Rubber (elastomer) used for the foot pocket, for the side stringers and for some inserts, to offer maximum quality and comfort. It features a fluid and undemanding kick, perfect for children and adults alike. Because of its extreme comfort, prolonged use of the fin is possible. The Clio is an excellent fin for snorkeling and swimming.

GLIO

AGUA SHORT

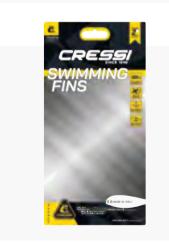

TECHNICAL FEATURES Light polypropylene bladeSelf-adjusting foot pocket systemAbove blade foot pocket Short blade MAXIMUM FLEXIBILITY

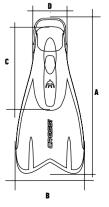

The Agua Short swim fin is the shorter more versatile version of Cressi's popular Agua long blade fin. The Agua Short fin is ideal for travelers and it is a concrete swimming aid either for pool or sea swimlovers or snorkelers. It has the same features as

Cressi fins such as an above-the-blade, self-adjusting foot pocket for incredible flexibility and comfort. The Agua Short fin is great for any level of user and it is a must-have for your next tropical vacation or water workout next time you travel.

ROMBO & MINI DRY

ROMBO MASK + MINI DRY SNORKEL

PINK/PINK-CLEAR/PINK

AZURE/AZURE-CLEAR/AZURE

LIME/AZURE-CLEAR/BLUE

Rombo is a frameless mask that boasts a low internal volume, making it excellent for freediving, snorkeling, or spearfishing. The design uses the assembly of the silicone skirt directly over a single tempered glass. This guarantees superb comfort and a perfect watertight seal. The Rombo's buckles are comfortable and effective, making adjustments quick and easy. The Mini Dry is a version of the Dry model

for kids. The snorkel has an original anti-splash end with a special valve that seals the tube as you dive, preventing the entrance of water when submerged. The lower end has a corrugated part that keeps the snorkel away from the mouth when not in use. A special water collection cup, with a large discharge valve makes expelling water quick and easy.

TECHNICAL FEATURES

- Low volume, single lens design for a wide field of view Frameless: soft and comfortable silicone skirt bonds
- directly to the lens
 for lower weight and reduced drag
 Fast-adjust ratcheting strap buckles mounted to skirt

- High grade silicone sealsTempered glass lens

SNORKEL

- · Anti-splash end with automatically closing valve
- Ergonomic shape for maximum comfort Mouthpiece and corrugated part in hypoallergenic
- · Discharge cup for easy and quick emptying

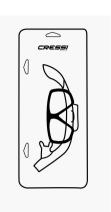

ONDINA MASK + TOP SNORKEL

CLEAR/YELLOW CLEAR/BLUE

CLEAR/AOUA CLEAR/PINK

The Ondina mask is the smaller version of the Onda. It's a single tempered lens mask suitable for young water lovers and is designed for snorkeling, swimming and scuba diving. The mask skirt is made from soft hypoallergenic transparent silicone with a double feathered edge that gives an excellent seal on many face types. The Top snorkel is a modern, small semi-dry snorkel. designed specifically for kids. The tube is made from a transparent, contoured

and flexible material. The quick-release snorkel keeper system allows height adjustment for comfort. The top end of the tube ends with a semi-dry splashguard to prevent water from entering the tube even in rough water. The angled 100% high-quality silicone mouthpiece is designed for extreme comfort even during extended use. The top snorkel has a large internal elliptical one-way purge valve at the bottom for improved drainage.

MAREA JUNIOR

CLEAR/BLUE

CLEAR/PINK

The Marea Junior is the smaller version of the Marea adult. It is a 2 windowed mask particularly suitable not only for snorkeling but also for scuba diving. It has dual tempered glass lenses, a double feathered skirt edge that adapts to most faces and a small inner volume that is perfect for going deep underwater. The Marea Junior is made from 100% high quality sealing soft silicone that offers extraordinary and unprecedented comfort and fit. The mask is equipped with micrometric buckles to easily adjust the strap. Thanks to the silicone hand-nose pocket, it is easy to equalize the pressure even wearing gloves.
